

BULLDOG GRIP CLOSES ON LENS

Slowly but surely the British forces fighting for possession of the great French coal center are showing forward in their encircling movement. Today's dispatches tell of the Canadian capture of the town of Eleudit-Leauvette, just one-half mile southwest of Lens. At this point, indicated by the arrow, the British are closest to the coal metropolis.

BRAINS AND SPEED WAR'S GREAT NEED

Lord Northcliffe Declares Every Industry of U. S. Must Be Mobilized

ASSAILS CENSORSHIP

NEW YORK, June 29.—"I hope that America may permit her newspaper and magazine writers to be absolutely frank about what is going on. It is as important for the nation to know the worst as it is for the nation to know the best."—Lord Northcliffe.

Lord Northcliffe, British High Commissioner to the United States, in an address to magazine editors and writers, expressed the hope that the United States would not muzzle the censorship as England did the first three years of the war.

"America can and will do a tremendous part in this war, first, because she is fresh, and second, because she undoubtedly will profit by the mistakes of the nations who have been fighting since August, 1914," said Lord Northcliffe. "What we need more than anything else is brains and speed."

"I trust that the United States will not make the censorship blunder that England made and which is just becoming an evil of the past. England was kept in the dark for nearly three years. She was blinded by the fatuous optimism of soldiers and politicians who, while eager in peace, were incompetent in war. The people were not permitted to know the truth, and when the truth finally emerged they were left to accept it."

"Every man with a pen in hand and a printing press nearby can do a patriotic service to his country by identifying himself to the fact that this war is just beginning and that every ounce of energy, that every revolution of America's vast industrial machine and what is equally important, every atom of the human mind, should be directed to the winning of this war."

"It is only by an absolute mobilization of man, power and machine power that this war can be won. Industries that at this moment seem remote from mobilization for the war will sooner or later be called upon to do their part. In Europe, for example, the largest corset factories in mass turning out very delicate pieces of machinery needed in the construction of airplanes."

"The war, which has proved the efficacy of motor transport to an almost incredible degree, will make a tremendous drain upon the automobile industry in your country. For one thing, the great bulk of automobile fuel will have to be concentrated on trucks. In the second place, the automobile factory will inevitably be commandeered for the manufacture of airplane parts and airplane construction generally."

"I have a strong conviction that with peace will come a close federation of the nations who are now fighting the great fight for freedom. You have only to call the United Nations of Great Britain today to see the effect that the war has upon the ordination of peoples and nations. The conflicting temperaments and national structures..."

So-Called Parliament Does Not Represent All the People, Envoy Says

RUSSIAN ARMY GROWING STRONGER, BELGIAN SAYS

STOCKHOLM, June 29.—The Russian armies are becoming better organized and are growing stronger daily. The Russian coalition government is increasing its authority and cohesion.

The Brazilian Government, by act of Congress late in May, authorized the revocation of Brazil's neutrality in the war between Germany and the United States. In notifying the Brazilian legations of the sanction of the revocation, Senhor Pecanha said that Brazil up to that time had refrained from taking sides in the European conflict, but that the republic could not remain indifferent from the moment the United States found itself involved in a struggle for the rights of the people, and when Germany meted out indiscriminately to Brazil the most brutal treatment.

A dispatch from Rio de Janeiro on June 9 said that diplomatic exchanges with representatives of the Entente Powers were in progress and that practical results might be expected soon. It was added that warships of the Entente would be permitted to visit Brazilian ports without adhering to the time limit imposed by neutrality regulations.

They were taken to a hospital in the time limit imposed by neutrality regulations.

PETROGRAD, June 29.—Fighting was reported from a number of points on the western front by the Russian War Office today. Near Kovel, west of Lemberg, the Germans attempted a series of attacks, but the waves were thinned by the wind before they reached the Russian trenches near Irpinsky, in Galicia. Russian trenches were 100 feet deep.
