

SCENES FROM THE BATTLE ZONE IN EUROPE AND A VIEW OF THIS COUNTRY'S PREPARATIONS FOR WAR

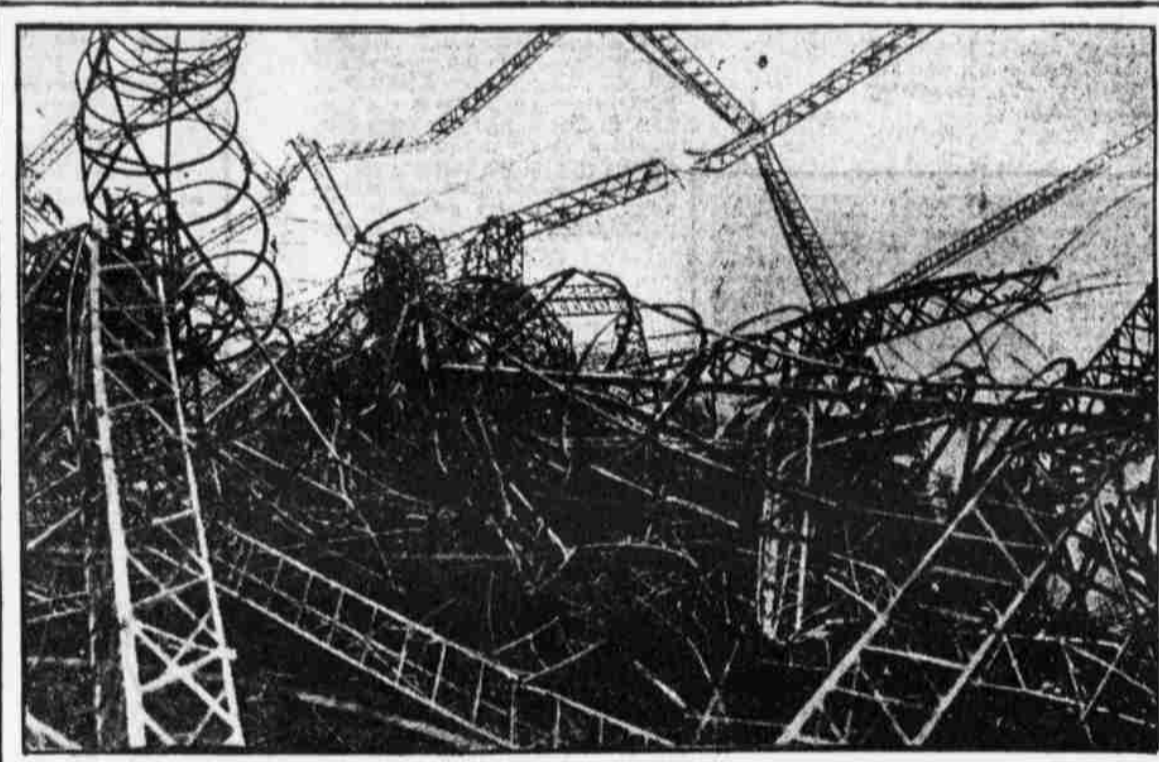

Copyright International Film Service.

**PART OF THE "ROOKIES" DAILY STUNT**  
The sailor's life is not all jolly in wartimes. The day is filled with different drills and varied maneuvers. This photograph, passed by the censor, shows the newcomers in mine-laying practice.

Photo by Underwood & Underwood.

**"HUG THE GROUND TIGHT," IS THE INSTRUCTION TO ENGLISH SCHOOL CHILDREN**  
The children of a Sussex school are being instructed in the manner of behaving when a German air raider is suddenly signaled. At the alarm the children lie down on the ground, face to the pavement, waiting for the Zeppelin or airplane to pass by. This practice has materially lessened casualties from air raids.

**WRECK OF A ZEPPELIN BROUGHT DOWN DURING A RAID OVER ENGLAND**  
The marksmanship of the anti-aircraft gunners in England is constantly improving. Each visitation by Teuton fliers leaves behind its smoking tribute to the Tommies' accuracy. The photograph shows the remains of a raider brought down in East Anglia during the raid of June 17.

Photo by Kadel & Herbert.

**THIS GRIM PERSONAGE IS A "TRENCH CLEANER"**  
This French soldier is used simply to hunt for hidden enemies after a trench is taken. He is equipped with a revolver and dagger, because of the narrowness of the trench, and gas mask.
