CLEVERNESS DOES NOT CONSIST IN BEING MERELY CAUSTIC

The Girl Who Only Scintillates When She Is Cutting-Suffragists Versus Suffragettes-Their Respective Attitudes on the War

SEVERAL girls were discussing an absent acquaintance. All agreed that she was extremely clever except one girl, who said: "She says clever things, yes; but cutting. Real cleverness, to my mind, means saying funny things without making them cutting, for it is dead easy to be caustic."

d dead

Thus she illustrated her point.

But, after all, is there not a great deal of truth in what she says? Some girls have undeniably a ready tongue when it comes to making cutting remarks at the expense of their friends whose weaknesses they have carefully studied, but the really clever person is she whose small talk is not limited to the failings of her intimates, but who can express herself entertainingly and originally on almost any subject.

I know one girl who is habitually silent when others are conversing in a group about things at large. But let the con versation narrow down to one person, and that some one she knows, and she immediately grows communicative and positively scintillates. And all at the expense of this one person.

RECENT issues of The Woman Citizen, the official organ of the National American Woman Suffrage Association, contain on the back cover the following statement: "The country is asking of women service as farmers, mechanics, nurses, doctors, munition makers, yeomen, bellboys, messengers, army cooks, ambulance drivers, men's substitutes in industry and trade, advisers to the Council of National Defense-and the country is getting it! Women are asking of the country enfranchisement. Are the women

going to get it?" Most American women have sufficient is a time for something more than brassfaith in the American man to believe they will

IN THE MOMENT'S MODES

MOST of us have noticed the marked benefit that we have gained from the use of acid fruits. Not infrequently one suffering from dyspeptic disorders is greatly relieved by taking the juice of a lemon moon after meals. Others have been bene-fited by apple juice and others by moderately acid fruits.

The nature of this beneficial effect of fruit was not understood until the recent experiments by Fawlow and others, which have succeeded in demonstrating two things -first, that the acids of fruits stimulate the stomach to produce gastric acid, which is absolutely emential for good digestion; and, second, that the acids of fruits are able to take the place to some extent of

Jim said, "Oh, can the hot air. I want the kid, I'm going to get out, but I'm going to take him with me." I said, "Yes, you are, nit." Jim looked at me kind of curiously for a minit and said, "What are you so crazy about him for, why do you want him?" I said, "I don't know what I want him for. I don't know, but you won't have him. He's the first thing I ever had in my life that's sweet and clean, and he's the first thing that ever loved me without thinking what they could make out of me. Why, when he was in the country and he'd come to the gate to meet me, with his eyes shin-ing with love and his face all dimpling with laughs, I'd choke up and some times not be laughs, I'd choke up and some times not be able to speak. Billy's made me live. He's made something new come to me, he's made me see all life different, and I'm going to pay him back for what he's done for me by giving him a chance." Jim laughed, "You give him a chance," he said, "what kind of a chance can you give him?" I kind of a chance can you give him?" I said, "I don't know for sure. I ain't got t all figured out, but he's going to have his chance to grow up like other men." Jim acted sore again and said, "Ah-what's the use of talking. We're wasting time. I want money and I'm going to have the kid. If I can't find him I'll put the gang wise. and some of them'll find him all right." At that I think I just went off my head, and I didn't care whether the police heard me or not. I said, "Jim, don't you dare to try to take Billy. Don't you dare to put any of your dirty gang on to get him away from me. I tell you I'll peach on you, I'l find out where you're hiding and I'll bring

the police there myself. I'll fight for Billy, I'll fight as any woman'll fight for a baby. If you dare to touch him or let any of your aneakin' pais come near him, I'll follow you till 1 see you behind the bars if I have to follow you till Hell freezes over." Jim seemed as if he couldn't speak for a minit, then his face got red and he came towards me. He said, low and flerce like, "Tell me where that kid is." I said, and moved away from him, "I won't tell you." He sald again to me, "I say, tell me where he is." I said again, "I won't tell you. He's planted where you'll never find him."

I was standing by the bed and he grabbed me by the throat, and bent me over backwards, and his eyes just burned into mine "Oh," he said, "You won't tell me, you won't -we'll see if you won't, by--" and just then the door opened and three plain clothes men and two cops walked in. I don't know how it happened. I don't know nothing that happened after Jim turned and knew the game was up, but there was three quick shots all at once, and when the smoke cleared away, Jim was lying on his back on the floor, one of the plain clothes men had a bullet through his shoulder. They bent over and found that Jim was all in. Pretty soon an ambulance come, and he was took away. Recipe for Bran Bread

To the Editor of Woman's Page: Dear Madam—Please give a good recipe for bran bread, also state if bran and graham flour are the same? (Mrs.) M. L. J.

The difference in bran and graham flour was explained in Wednesday's Evening LEDGER.

I am giving you two methods of making an bread. One calls for baking powder, bran bread. One ci the other for yeast:

Bran bread (yeast)-One-half cupful boiling water, one-half cupful scalded milk, two tablespoonfuls shortening, two tablespoon-fuls molasses, one and one-half teaspoon-fuls salt, one-half yeastcake, one-quarter cupful lukewarm water, one cupful entire wheat flour, one cupful while flour, two cup-fuls bran. Mix the water, milk, shortening, molasses and sait. When lukewarm add the molasses and sait. When inkowarm add the yeastcake, dissolved in lukewarm water, then the sifted flour and bran. Mix to a soft dough. Let rise until light, cut down, knead into small loaves, using more bran if necessary to prevent sticking. Let rise again until nearly double and bake about fifty minutes in fairly hot oven. Bran bread (baking powder)—Two cup-fuls bran, two cupfuls entire wheat flour, me teampoonful sait, one-half teampoonful

fuls bran, two cupfuls entire wheat hour, one teaspoonful salt one-half teaspoonful moda, five teaspoonfuls baking powder, one-half cupful molasses, three-quarters cupful water, three-quarters cupful milk. Sift to-gether the flour, salt sods and baking pow-der, then add to bran; add molasses and leuids and beat thoroughly. OLD MAN JINX ON THE JOB TODAY WITH A VENGEANCE Friday the Thirteenth Is "In Our

Midst" Again With All Brands of Bad Luck

This is the day every human should keep tabs on his temperament. All sorts of things are scheduled to hap

pen, no matter how efficient you may be. For the seers have told us that Friday the 13th is fraught with the gravest gloom. It's a good day to keep off railroad tracks and out of airplanes unless you're a regular fighter. It is also unwise on such a date to stand under a safe which is being hauled

nto a tall office building. Eat your food slowly, for the Jinx in lurking in restaurants as well as elsewhere If there are thirteen passengers in the car which you take home, get out and walk. This Friday the 13th is more ominous than all its predecessors. It is just pos-sible that potatoes will take another jump skyward, and the milkman may even de-cide not to serve you unless your name is in "Who's Who" or the "Blue Book."

If you are going to move, change the date until tomorrow. When you think of all the trouble that follows moving on any normal day, just imagine the horror which

would accompany such a task today. The plano may fall out of the window and the moving man is liable to have in-terior burdens which will make him fail just as he is carrying your cut glassware into the new house. Watch every move you make. Walk

slowly and be careful what you say. It is the day of irritable moods and the spirit of combat is in the air. There are many brave persons who will wed today in spite of the date.
