

GOSSIP OF THE STREET
HOW GERMANY REPLENISHES GOLD IN IMPERIAL REICHSBANK

FRANCO-PRUSSIAN WAR INDEMNITY SAID TO BE BASIS OF HOHENZOLLERN WAR CHEST—GOSSIP OF THE STREET

MATTON F. BANKS, the local representative of the Guaranty Trust Company, 140 Broadway, New York, with offices in the Philadelphia National Bank building, tells a story which would seem to solve the mystery as to how the Imperial Reichsbank of Germany managed to increase its gold holdings from time to time during the progress of the war.

"I got the story," said Mr. Banks, "from a high officer of one of Philadelphia's great institutions. He told me, the speaker continued, that a short time ago he was dining with the manager of one of London's largest and best-known banks when the question came up as to the source of the Reichsbank's gold came up.

"This Englishman said that many a time the question had been asked, and had been answered as to what became of the \$1,000,000,000 (5,000,000,000 francs) which France had paid to Germany after the Franco-Prussian war in the early seventies. The indemnity had been paid in English gold sovereigns.

"Shortly after the present war began," said the Englishman, "a man came into the bank in London to deposit some sovereigns which he had in a canvas bag. The bag was new and bore the imprint of the coinage of 1871.

"Attached to the bag was a tag which showed they had been shipped originally from the Bank of England to France, and further tracing proved most conclusively that they were a part of the original indemnity paid by France to Germany.

"Further than that," he continued, "just previous to the time war began, and immediately afterward, the current of exchange from the Scandinavian countries was in favor of England, and these countries kept pouring in those 1871 new sovereigns to offset the balance of trade.

"It is now known that the German Emperor started a 'war chest' in the Castle of Spandau with this gold indemnity fund, and kept constantly adding to it against 'The Day,' and the fact of these sovereigns finding their way to England shortly before and since the war shows conclusively that Germany had really commenced to dip into her war chest a little prior to the actual breaking out of hostilities.

"As long as this Spandau war chest contains any gold," remarked the Englishman, "the Reichsbank can replenish her gold reserve—so that the increase is no longer a mystery."

"A strange thing," said Mr. Banks, "is that on the day that story was told to me I was sitting beside a bookcase that held a file of the bound copies of the 'Financial and Commercial Chronicle' since it first started, and I took down one of the early volumes, the one for 1873 and 1874, and on opening it at random an article met my eye, entitled 'What has become of the indemnity France paid to Germany?'"

"The article was interesting, but offered no solution. By the way," added Mr. Banks, "these old volumes of the 'Financial and Commercial Chronicle' are most interesting, especially when a comparison is made of some of our financial institutions as they were then, compared with what they are now."

"Sees Difficulty in Selling New Liberty Bonds Unless the Government permits inflation, as was done during the Civil War," remarked an investment banker in the central section of the city, "there is going to be great difficulty in selling the next issue of Liberty Bonds.

"The hurrah methods of selling the first issue, in my opinion," he said, "will not work a second time. When people come to town on the heels of the first one, they don't believe. They had all been worked up for the first one and everybody wanted to buy, but it is a different proposition when the second one comes along."
