War Must Be Fought to Decision, American Commander Declares

CAN BE NO STALEMATE

Military and Economic Power of U. S. to Count Heavily in Germany's Defeat

FIELD HEADQUARTERS OF THE AMERICAN ARMY IN FRANCE, Oct. 8. The war is to be fought out to a decisive victory for the Allies on the western front. there is to be no draw.

This was the opinion emphatically given by General John J. Pershing, the American commander-in-chief, in an interview today. The American commander has the utmost confidence in a military victory for the

Repulying to a question today as to re-ports circulated in the United States that a stalemate may develop on the western front, General Pershing said:

"German propaganda, working in America through the agency of our pacifists, would spread this idea among our people in order to weaken our initiative.

"Having lost the tactical advantage on the Tyres sallent, which they had held for more than two years, the Germans continue to yield ground before the hammering of the Ritish assaults. Everywhere on the western front, despite the large number of German troops released by the Russian situation, Germany is on the defensive and the Allies are upon the offensive.

"America has the resources in men and materials once they are prepared to add the weight which must force a military decision against Germany." to weaken our initiative.

Headquarters reports today emphasized plendid progress achieved by the American gunners in laying down perfect, coordinated and accurate "curtains of fire" in their practice.

American Ambassador Sharp concluded

his first visit at the Sammees' training camp today with a lengthy call on General Per-

whing. "The training camp." Sharp said. "Is the focal point of our war preparations. The nation's spirit culminates here in these opiendid young soldiers. As I watched their drill I could have no doubt of victory—knowing that a united nation was behind them."

Music's Re-creation Will Make the Home Brighter

USIC is the fourth great essential of human nature. First food, then raiment, then shelter, then music. All people instinctively love good music. Those who seem to prefer "popular" do so only because they have been denied the opportunity of hearing the great artists on account of the expense.

The NEW EDISON Phonograph places the talent of the world's greatest artists in your nome at a nominal cost, bringing to even the most humble the inspiration of the great artists' living voice. No mere talking machine can so stir your heart, for the Edison Diamond Disc is the only instrument that re-creates the soul of music.
