"Covernment bakeries? There no need in Philadelphia,' was emphatically asserted by William Freihofer, president of the Freihofer Baking Company . . . and a member of the War Emergency Council.

"That the Philadelphia baker needs no prodding to patriotism and has already gone much further in value-giving than could possibly be enforced by any 'standardized loaf' was further asserted by Mr. Freihofer.

"In proof thereof he pointed to the Freihofer 'Liberty Loaf,' so christened

when placed on the market.
"This loaf, which is 1712 ounces in weight and specially made to retail for ten cents, is just as truly a tribute to natriotism as any Liberty Rond ac-

cording to Mr. Freihofer, "Declaring that it represents the highest bread-value possible today, Mr. Freihofer said Liberty Loaf is a war bread only because the ingenuity which made it possible is the result of the urgent necessity to stop waste at this time. It is not made of substitute ma-

terials, as is the war bread of Europe. "The process by which the new bread is made concerns itself both with the milling and the baking. Before putting it on the market, Mr. Freiholer declared it was tested on his own table. 'And we found that on the fifth day it was just as good, if not better, than when the loaf was first cut."

"'It was to help Philadelphia housewives save a slice of bread a day,' Mr. Freihofer continued, 'that the Liberty Loai was born.
