GOSSIP OF THE STREET-LOCAL MARKETS-CURB QUOTATIONS Woods Tells of Police

EYES OF WORLD EAGERLY WATCH SECOND LIBERTY LOAN CAMPAIGN

Topic Uppermost in Minds of Americans and Peo-ple on Both Sides of Atlantic Interested in Similar Degree—Gossip of the Street

THE one thing uppermost in every bank and financial institution, on the street, in the brokers' offices, at every turn and corner and in almost every conversation is the success of the Liberty Loan campaign. Every one seems aroused to the paramount importance of its unqualified success. We all know Europe is watching anxiously for the result on both sides of the fighting lines. Germany completed her seventh war loan last Thursday and, judging by the comments of the Cerman press, there is no hurrahing about it, as in former loans. Some of the sopeals made to the German people seem absurd when read in the light of the real situation as we know it. The usual stock appeals of "three years of successful cuffict." a "long war forced upon us." the "enemy has rejected with scorn cur offers of peace," etc., will scon become so hackneyed that even the Germans must begin to see a light.

"Taking the minimum amount we expect to exceed, \$3,000,000 000, it will be the largest loan ever attempted in this county. In fact, only two other loans have exceeded this amount—the German loan of April, 1917, of 12,770,000,000 marks (\$3,041.—11,000 converted at the normal rate o fexchange) and that of Great Britain put out real situation as we know it. The usual stock appeals of "three years of successful

in January and February of this year providing for new money equivalent to

It must be borne in mind that this Second Liberty Loan is only one step in the task to be successfully carried out in the prosecution of the war. Our total appropriations for the fiscal year ending June 30, 1918, call for \$18,278,643,452. About \$1,000,000,000 of this will be raised by taxes, leaving about \$14,000,000,000 to be raised by bond and other issues. A large part, approximately \$7,000,000,000, will \$45; be lent to our Allies, and the burden of interest charges and repayment will finally rest upon them.

of the \$7,000,000,000 which is our own debt, about \$1,900,000,000 will be spent on shipping, which will unquestionably make handsome return, both during and after the war, so that our actual net unproductive debt will be about \$6,000,000,000.

Although \$6,000,000,000 is a large sum, it is very small when compared with our national resources and national income. France, with a wealth before the war of \$55,000,000,000, or less than one-quarter of our present wealth, was carrying a debt of \$6,404,314,000, while her present debt is about \$20,000,000,000. If we were proportionately in debt, we would be carrying a load of \$70,000,000,000 to \$80,000,000,000. Great Britain, with national resources in 1914 of about \$85,000. 000,000, has a debt of \$17,336,000,000, and still there seems to be no impairment in Great Britain's ability to carry on the war due to a lack of financial strength. In proportion to our national wealth, a similar debt for the United States would be \$51,000,000,000, instead of a net unproductive debt of \$6,000,000,000. The interest charges on all of our war loans for the fiscal year to June 30, 1918, would be less than 114 per cent of our present national income.

Republic Iron's Excess Profits

The Republic Iron and Steel charged up to the account of excess profits during the nine months ending September 30 the sum of \$8,636,665. This would almost amount to \$40 per share on the common stock and would at the same time amount to an annual rate of about \$11,500,000.

It is now freely spoken of in financial circles that this company promises at the rate of present earnings to earn between \$50 and \$60 a share on its \$27,191,000 of common stock. Putting it another way, it is said the Republic Iron and Steel bids fair to earn between \$99 and \$95 per share on its common, of which the Government will collect about \$40 per share in taxes.

In 1916 this corporation earned 47.67 per cent on its common stock, but at present it would seem that the earnings toward common with the excess profits fax deducted would be larger than last year.

Until recently the Republic Iron and Steel was not distinguished for enormous earnings, and it will unquestionably be a source of gratification for its stockbolders to know just what is the present outlook.

Indications are, however, that the present record may not be sustained, as there is a decrease in unfilled orders, but not enough to affect to any very appreclable extent the present very prosperous conditions.

More Trust Companies for Federal Reserve

The plea of President Wilson for all State banks and trust companies to join the Federal Reserve system and thereby help win the war is beginning to have its effect. Further indications of the favorable attitude of such institutions on the President's appeal were shown by the announcement that two of Philadelphia's largest trust companies, the Philadelphia Trust and the Pensnylvania Company for Insurances on Lives and Granting Annuities, and the Wilmington Trust Company had voted to

In New York State, where the operations of trust companies are somewhat different from those in Pennsylvania, every day witnesses a number of these institutions seeking membership.

One banker who is taking an interest in the matter said today he believed when the Pennsylvania State banks and trust companies begin to realize the importance of the matter they will come in more rapidly than the New York concerns, as the principal motive actuating their action would be pure patriotism and, he said, Pennsylvania has never had the patriotism of her citizens questioned when their duty was clear. He believed that when the present Liberty Loan campaign is over a large number of trust companies would be heard from seeking membership.

General Bond Market Listless Here

Outside the sale of Liberty Bonds, the bond market, as far as Philadelphia is concerned, is dead. Nobody seems to expect otherwise, and there is no complaint, nor are there any excuses to file, as was the case with the recent depression in the stock market.

A majority of the few inquiries are for municipals, which gives rise to the belief that once the Liberty Loan is well out of the way there will be a brisk market for good municipals.

As there is no countrywide demand for bonds, prices have largely remained stationary, except in a few instances where there was an apparent sympathy with Evrrent stock quotations. Only the highest grade of railroad issues escaped the general decline of all securities last week, and these revived somewhat from pre-Vious low prices as the market went up.

Trade Acceptances Gaining Favor

An increase of \$50,000,000 in bills discounted by the twelve Federal Reserve banks in the two weeks from September 28 to October 12 indicates a wider use of the rediscounting facilities of this system, and would indicate also a more universal

New York and Boston lead in this rediscounting, but Philadelphia seems not to have struck her gait. In the two weeks mentioned New York jumped its total amount from \$75,000,000 to \$142,000,000, which shows that some of the others fell eff. As the extreme stringency in rates seems to have passed, the general opinion is that the increases in rediscounting will be smaller, for a time at least,

Fifteen Per Cent Rate Increase Case Still Open

The decision of the Interstate Commerce Commission, in response to the request of the eastern railroads for financial relief, by reopening the 15 per cent rate ad-Nance case is to have the first hearing in New York on November 5, thus setting Maide the request of the railroads that the case be continued for sixty days.

"The 15 per cent case is still open and before the commission." was the statement made by the commission to George Stuart Patterson, counsel for the eastern rail-

"If your suggestion is well grounded," continues the statement, "that further financial relief is needed by the carriers, it is obvious that such relief should be had promptly in order that transportation demands in time of war may be fully met. The committee is emphatically of the opinion that the evidence necessary to establish the full truth should be presented without delay in order that the carriers may

be maintained in a position to do their full war duty." This decision of the Interstate Commerce Commission to continue the case as early as November 5 will no doubt find some of the railroads napping and unprepared with the necessary figures to prove their contention, but it opens the door for the admission of evidence looking toward a general advance in rates east of the Mississippi and north of the Ohio River on certain commodities on which advanced rates were refused by the committee last June.

No Drop in Market at Close of Campaign, Is Opinion

It is the almost universal opinion in the financial district that while the market will continue to rise during the remainder of the week, as long as the Liberty Loan campaign is on there will be no sudden break such as followed the close of the first campaign. But the stock market has a way of conducting itself in a manner regardless of general opinion, and no one can safely predict at the present stage of the game what may or may not happen a week from now. If people knew beforehand just what was going to happen on the stock market there would be little use for a stock exchange. There are certain gentlemen connected with the exchanges who make a study of human nature as well as stocks, and if they thought the public expected the market to go one way or the other they are prepared to est for their own and not for the benefit of the investing public.

Lovett Sees Prosperity on Pacific Coast

Judge Robert S. Lovett, chairman of the Union Pacific executive committee and in charge of priority orders for the Government purchasing board, has just returned

from a trip over his road and says: The country is in fine condition. I found Pacific coast cities more prosperous than ever before. I don't expect to see Union Pacific gross earnings grow much feer over the next few months, but I do expect them to hold their own and to White or no decrease. Conditions of the property are much better than I ex-tent to find in view of the great labor shorings. The country's two chief prob-lust now are shorings of hiber and shorings of material."

INTER-LUBE CHEMICAL LEADS IN BROAD STREET CURB TRADING

Makes New High Record on Announcement of Important Contracts-Oils Lower, but in Good Demand

Inter-Lube Chemical was the most prominent feature of the trading on the Broad Street Curb, that stock moving up to 3%, a new high record move. The buying was based on official information in regard to the making of important European contracts for the company's product.

Other stocks were generally lower, with the motor stocks under most pressure. Chalmers sold down to 5 and the preferred sold down to 10. United Motor ranged from 20% to 20%.

The oil stocks ranged lower, but were in good demand at moderate recessions Merritt reached from 33% to 33%, and Midwest Refining sold at 142 to 140. Northwest was fairly steady at 89 to 86 cents; Elk Basin sold at 8% and 8%; Osage at 8% and 8, and Oklahoma at 8% and 8.

Mining stocks were steady, with Nippissing in brisk demand, advancing to 81/2. Nixon Nevada sold at 78 cents; Mason Valley at 8%, Emma Consolidated at 11-16 and %, and Calumet and Jerome at 1% and 1 1-16. There was only a triffing volume of business in the airplane stocks, Wright-

Martin selling at 8% and 8%, and Curtiss at 34. Submarine was easier, with trading at 1612 to 15%. Lake Torpedo sold at

41% and 41%, and United States Steamship at 37%. Actna Explosives was steady, with sales at 514 to 5; Maxim seld at % and %; Air Reduction sold at 84. INDUSTRIALS

Samuel

Mardalene Church.

Mardalene Chu

my first general order an invitation to the policemen to come to me in person if they had anything to ask. I went around the streets and saw the policemen, letting them know that I'd stand by them if they did their work properly. Since I have been in office, over three years now, I have not done a favor for any one. The police are beginning to know this now.

"I want to say," continued the Commissioner, "that anything I might do is by reason of the Mayor's co-operation. I dropped in upon Mayor Mitchel one day and found a man talking to him about transferring a police captain. The Mayor's face lighted up when he saw me. Why, here's the man you want to see!" he said. It wouldn't do any good for me to ask him fo have your captain transferred. He wouldn't listen to ime.

"A commissioner cannot run a police force efficiently." Mr. Woods emphasized, bringing his hand down on the table, "without a free hand given him by the Mayor." "At the present time," he went on, "the New York police know that poor work cannot he counteracted by supposedly in fluential friends or good work nullified by enemies at court."

Mr. Woods then told of a motorcycle cop who had confided to him one dark night without knowing who he was the follow.

Without here's and int. First willing commentary.

head of the force. If they believe that the head is conscientious and hard-working they find it safe to do right and perform their duties like men. But do you realize that it isn't safe in some places for a policeman to do his job as it should be done? It isn't the fault of the poor, underpaid cop if he falls into temptation when those over him are not doing their duty.

"You would be surprised and shocked to know at the present time that pickpockets yo into a city and make arrangements with the police beforehind with regard to protection for picking pockets. Why do we pay policemen so little and subject them to such terrific temptation." Three pickpockets in New York told me not long ago that they were willing to pay \$10,000 for the
