WASHINGTON, Oct. 27. the Kaiser."

This was the rallying cry that rang broughout the land today as the army of liberty Loan campaigners began their final day's drive to achieve the maximum goal. On the basis of reports early today, Treasury officials were optimistic that the high mark would be attained and, possibly passed by a good margin before midnight tonight. At that hour the closing of the subscription books will end the most remarkable money gampalen in American history. From President Wilson down, officlass were in accord that the record of this drive, when tabulated, will be another un-answerable argument against the enemics

of liberty.

Treasury officials at the beginning of the day saw indications in reports from virtually every Federal Reserve district that the total subscriptions had reached approximately \$4,000,000,000. Hourly returns this morning indicated that the nation is pouring out its wealth in unstinted measure for Liberty Bonds. The drive in the New York, Boston and Cleveland districts was going ahead at a most remarkable pace. Early reports showed that all districts had safely passed their minimum quotas. Several districts were pushing close to their maximums, with indications that their highest marks would be exceeded before the final curtain falia.

Realizing that today's returns to reach the desired figures must overtop Liberty Day's smashing record, set up for a single virtually every bank in the United tes will hold open its doors until mid-at or as long as bond buyers are in it.
