

50,000 SOLDIERS SEEK INSURANCE

War Life Policies Applied for Represent Total of \$450,000,000

McADOO WELL PLEASED

By a Staff Correspondent
 WASHINGTON, Nov. 14.—Treasury Department officials are particularly well pleased with the rate at which the war life insurance is being taken out by the soldiers of the United States Army. Approximately 50,000 applications for war insurance, representing a total insurance of about \$450,000,000, it is estimated by the War Insurance Bureau, have been received at the Treasury Department since the plan of insuring the lives of the country's fighting men went into effect a month ago. These figures represent only the amount taken out by the soldiers in the United States and large additions to these totals are expected in a few days when the applications from the many thousands of men in France known to be on the way here, are received.

Secretary McAdoo, who is enthusiastic over the response, denied the published reports that the Government has sent out a large corps of men through the army camps in this country and to the camps in France in the capacity of insurance agents, to solicit subscriptions. The policies have been taken out in liberal amounts, the average applications ranging from \$5000 to \$2000 a man, or within \$1000 or \$2000 of the maximum amount that can be taken. Almost all the officers have applied for \$10,000 worth of insurance, the maximum amount obtainable, only a few being satisfied with \$5000. The men also have asked for amounts well on toward the full amount.

TOBACCO FUND GROWS; MORE MONEY NEEDED

Philomusian Club to Give Card Party to Add Impetus to Good Cause

Nothing is too good for the boys who are risking their lives to perpetuate those policies which were mapped out by a few determined Americans at Independence Hall July 4, 1776; therefore, the "Smokes for Sammees" fund is increasing at a healthy rate.

Many events are scheduled during the next few weeks to boost the treasury for this worthy cause. Meanwhile, do not rest on your oars and bear in mind that a weekly contribution, no matter how small, will help considerably. The fund is starting toward the \$17,000 mark, but it will require more than \$100,000 that figure to provide cigars, cigarettes, bags of tobacco and pipes for all the fighters who are "going over." Now is the time to enlist in the army of givers. Dig down in your pocket and give what you can. No limit has been placed on the amount of your contribution. If you cannot find a quarter, send along a dollar. There is plenty of room for it. Send your money to the tobacco committee of the Emergency Aid, 1425 Walnut street. The Philomusian Club will give a card party at its headquarters, 3944 Walnut street, tonight for the tobacco fund for West Philadelphians in the National Army.

HOOVER RULING BANS BAKERS' FANCY BREAD

Must Conserve Sugar and Shortening or Have License Revoked

Bakers of fancy breads in Philadelphia and other cities probably will be forced out of business by the latest ruling of the Federal Food Administration. The bakers not only will have to stop selling fancy breads, but any who offers for sale any bread other than that prescribed by Herbert Hoover will have his license revoked and his business closed.

If any baker attempts to do business without a license, he faces a fine of \$500, two years' imprisonment, or both.

The whole purpose of the Government's latest ruling, according to officials of the food administration, is to conserve sugar and shortening. It hits makers of sweet and fancy breads badly.

For the present, the food administration announces there still be no restrictions on the baking of rolls, but the sweet roll is doomed to meet its fate of the sugar-coated and fancy bread. Rolls may be sold when weighing from one to three ounces, but they must be made of the standardized bread dough, and the baker cannot add any sugars or fats to them during the process of baking or after they are baked. Officials of the food administration said: "One of the great features of the food-control act distinguishing it from almost every other statute is that it gives the Government power to take drastic action without appealing to the courts. We refuse to grant a license to a man who does not agree to abide by the regulations, and then it is up to him to institute any legal action he desires. He becomes the plaintiff instead of the Government, and while he is prosecuting his suit his business is idle. We could not enforce food control, if required to prove our cases in court before being permitted to take action. The war would be over in many cases."

PACIFISTS IN WORKERS' BODY HUNT FOR COVER

Federation to Pledge United Support to "Peace With Victory" Slogan

WOMAN QUESTION RAISED

Charge Is Made That Employers Take Advantage of Situation to Displace Men

WASHINGTON, Nov. 14.—Secretary Daniels announces that important progress has been made in the problem of locating submarines, after which their destruction is a comparatively simple matter. Discussing the 40,000 separate suggestions, plans or models of devices submitted to the Naval Consulting Board since the United States entered the war against Germany, the Secretary said: "The idea that the submarine will be overcome by a miraculous invention is not now seriously considered. The more intimate knowledge the civilian obtains on this subject, the more convinced he is that the submarine can be conquered by persistently hunting him down by the weapon of which he is most afraid. This is the armed service boat, equipped with all the latest scientific devices and typified in the modern torpedoboot destroyer. Foreign naval authorities have frankly stated their admiration of the degree of perfection of American designs."

In regard to the protection of ships against the torpedoboot attacks, the undeniable evidence of recent months of submarine activity has demonstrated that the immunity of a vessel depends very largely on its speed and maneuvering ability. There is a possibility that some artificial means of protecting cargo-carrying vessels may be found practicable. In no other field have so many suggestions or so many duplicate inventions been presented to the board.

First, Indorsement of the Administration's conduct of the war; Second, Demands for a larger voice for labor in control of industries essential to the winning of the war; Third, Tendency of employers to use the war as an excuse for unnecessary employment of women to take the places of men.

It has become a foregone conclusion that a resolution pledging the united support of labor to "peace only with victory" will be adopted by an overwhelming majority. There has been a scramble of the pacifists and other insurgents to get on the bandwagon since the President's speech to the convention Monday. Virtually all anti-war sentiment has disappeared from the delegates.

The demand for a larger labor representation on the various Government commissions having to do with munitions-making industries has reached such a stage that adoption of a resolution along that line is regarded as certain. Resolutions which support the movement believe that the President will not hesitate to grant the demand by enlarging the commissions to an extent sufficient to give labor adequate representation.

The problem of female labor is causing considerable worry. The convention is not hostile to the employment of women wherever it believes they are necessary. Fear is felt, however, that many employers are taking advantage of the present shortage of labor permanently to supplant male labor with women workers. Such a condition, the delegates point out, cannot fail to reduce the standard of wages, and while it might not be felt seriously at this time, it would create an extremely unsatisfactory condition after the war.

Resolutions which call for establishment of better relations with Latin-American labor, and for organization of 2,000,000 Mexican workers in this country, are strongly supported. C. A. Vargas, delegate from the Mexican miners of Arizona, introduced the resolutions, and Samuel Gompers and other Federation leaders are understood to be giving their support.

ARMED SERVICE BOAT CHIEF U-BOAT FOE

Idea "Miraculous Invention" Will Overcome Submarine Discarded, Says Daniels

WASHINGTON, Nov. 14.—Secretary Daniels announces that important progress has been made in the problem of locating submarines, after which their destruction is a comparatively simple matter. Discussing the 40,000 separate suggestions, plans or models of devices submitted to the Naval Consulting Board since the United States entered the war against Germany, the Secretary said: "The idea that the submarine will be overcome by a miraculous invention is not now seriously considered. The more intimate knowledge the civilian obtains on this subject, the more convinced he is that the submarine can be conquered by persistently hunting him down by the weapon of which he is most afraid. This is the armed service boat, equipped with all the latest scientific devices and typified in the modern torpedoboot destroyer. Such a condition, the delegates point out, cannot fail to reduce the standard of wages, and while it might not be felt seriously at this time, it would create an extremely unsatisfactory condition after the war.

NEW JERSEY WILL HAVE NO GOVERNOR FOR A TIME

Edge's Trip South and Illness of Senate President Suggest Unusual Situation

TRENTON, Nov. 14.—From Thursday night and for the following ten days New Jersey will be without a Governor or even an acting Governor for probably the first time in its history as a colony and a State. Governor Edge is going on a vacation trip in the South, during which he will do some gunning and a few days of which he will spend with the New Jersey boys at Camp McClellan, Anniston, Alabama. Senator George W. P. Gaunt, of Mullica Hill, the Senate president, would ordinarily become acting Governor in the absence of the executive, but Mr. Gaunt is too ill to assume the responsibilities of the office and the State constitution provides that only in the event of the death or resignation or removal from office of the president of the Senate may the speaker of the House become the acting Governor.

Under advice from Attorney General Woodcock today Governor Edge will attempt no arrangement for an executive head of the State during his absence, but he will take a secretary with him, and keep in touch with the capital by wire every day and will return to Trenton speedily in case of an emergency.

I. W. W. Meeting Raided
 OMAHA, Neb., Nov. 14.—A meeting here of the Industrial Workers of the World was raided yesterday by the Federal authorities and the police, who arrested about fifty persons.

SNIPS OFF GIRL'S CURLS

Young Woman Loses Hair on Way to Camden Hospital

"Sam the Snipper" is at work again in Camden and the police are looking for him today.

Miss Amelia Baldwin, seventeen years old, 2946 High street, was robbed of six luxuriant auburn curls last night when she was jostled by two young men in a drug store on Broadway. One of them, she believes, is the person who snipped the curls off with a pair of shears. The loss was not discovered until she reached the Cooper Hospital, where she went to visit a sick friend. The snipper is believed to be the same person who cut off the curls of a high school girl last February.

MONUMENT TO MRS. WILSON

Memorial Shaft Erected Over Grave of President's First Wife

ROME, Oct. 14.—A monument erected here over the grave of Mrs. Woodrow Wilson, at Myrtle Hill Cemetery, near the shaft.

1894 1917
My Mother's Wedding Ring Came From Hamby's
 Since 1894, we have been crowding into our wedding rings the utmost value both in quality and price, so that today our wedding ring business is enormous, in fact nearly everybody wears a Hamby's Wedding Ring.
 Why?
 Because they are the best and priced so moderately.
 In 18 k. Gold \$5 to \$10.

Out of date in one thing

Where 1917 men are behind the times

Men pride themselves on being up-to-the-minute. They want the latest and most improved automobile. In war they want—and must have—the latest type of gun.

When a thing has outlived its usefulness, they discard it for something better. That's progress. The six and twelve cylinder automobile has replaced the old-fashioned, high-wheeled bike. The modern machine gun has replaced the old-fashioned blunderbuss.

But in one thing many 1917 men are far behind the times. Their heels are out of date.

The 1917 man is up to date in everything but his heels. Many men still wear old-fashioned inefficient leather heels.

Leather heels are doomed

They still stick to old-fashioned leather heels. Leather heels are out of place on hard pavements, as everyone now knows. They are too hard. They jolt the spine with every step. They jar away precious energy. They have outlived their usefulness and are being discarded.

The up-to-date heel is the O'Sullivan Heel. It is made for city wear. City men must bring their heels up-to-date or they will pay for being behind the times by pounding away their energy.

The 12 cylinder car has replaced the old bike

How to save your energy

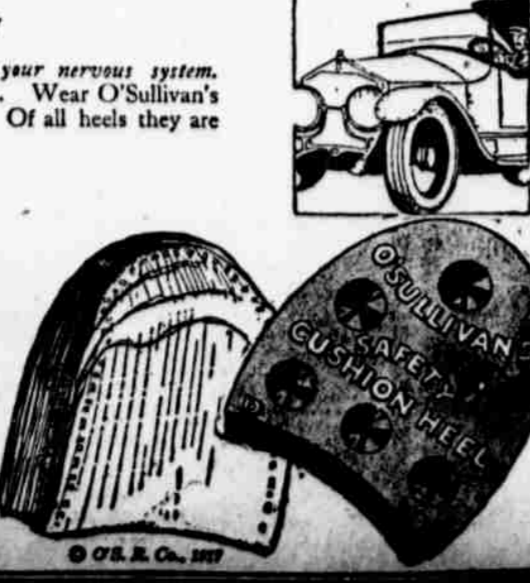

Save your heels, save your shoes—above all, save your nervous system. Don't pound away your health with every step you take. Wear O'Sullivan's Heels—they absorb the jolts and jars that wear you out. Of all heels they are the best suited to modern hard pavements and floors.

They are guaranteed to outlast any other heels. They will last three times as long as leather heels and will give uniformly satisfactory service to the very last. Because of our special process, O'Sullivan's Heels combine the greatest durability with the greatest resiliency. They are made of perfect heel material.

Buy your new shoes O'Sullivanized. Good dealers sell the latest style shoes with these heels already attached.

In black, white or tan; for men, women and children. Insist on O'Sullivan's—avoid the disappointment of substitutes.

The leather heel is doomed. It jolts the spine. And it does not give long service.

A Message to the Men of Philadelphia

In spite of the War Tax on cigars, in spite of the abnormal cost of tobacco and labor, the Girard Cigar will continue to be made of real Havana tobacco with a genuine shade-grown wrapper. And it will continue to possess the same famous never-gets-on-your-nerves quality which has caused doctors to recommend it in place of other cigars.

In order to maintain Girard quality without entailing a raising of retail prices three measures have been necessary. First, the sizes of the Girard have been slightly reduced. Second, we are doing with less profit. Third, the dealer is doing with less profit.

Under present conditions measures like these must be taken—or else quality must be reduced. Under no circumstances will we take the latter course. The unique quality which has made the Girard Cigar the best smoke for your health as well as your pleasure will continue to be maintained.

Insist on the Girard.

Antonio Roig and Langsdorf
