Only a few specialties made any important progress in the market either way in this morning's trading, there being little outside interest, with nearly all the business coming either from the room traders or from some of the pools in closely controlled specialties.

The railroad issues, however, attracted attention because of their general heaviness, there being little demand for these stocks around recently prevailing prices, and declines occurred in them in small

St. Paul common and preferred both declined about 1 point and there was a loss of % in Baltimore and Ohio, which sold at 51%.

Conflicting reports about the Marine dividend outlook were incentives for trading both ways in the preferred stock, with an advance of % to 924 and then a drop to 904.

There was a show of strength in United States Steel common for a few minutes after the opening when that stock rose to 92%, but traders

sold quickly, and that carried its price down to 91%. Mexican Petroleum showed strength, advancing from 821/2 to 841/4. with the buying coming to a great extent from interests identified with the management and the market position of the stock was helped by the announcement from Washington that there would be no Government price-fixing on the petroleum products.

General Electrics sold ex rights at 129%, a loss of about %. Leading dealers in bonds state that large interests are now in the market as sellers but do not force their holdings at concernions.

HELPS COTTON PRICE BY TRAFFIC TIE-UP

Early Sales for Foreign Ac- Little Can Be Hoped for in count Bring Sharp Rally to Market

NEW YORK, Jan. 14.—The following temperatures were recorded in the cotton belt this morning:
Knoxyllie and Oklahoma, 20; Macon, Armesta and Atlanta, 24; Chattanoona and Wilmington, 26; Abliene and Charleston, 28; Memphis and Nashville, 30; Montgomer; and Savannah, 32; Fort Smith and Thomasville, 34; Hirmingham, 30; Del Rio and Jacksonville, 38; Tampa, 49; Meridian, 42; Pensarola, 41; Shreveport, 48; San Antonio, 52; Vickshurg, 54; New Orleans, 58; Galveston, 60; Corpus Christi, 62.

NEW YORK, Jan. 14. With the exception of January con-tracts, which opened 15 points higher, due to bullish local conditions, the coton market opened 1 to 13 points lower today, influenced by higher temperatures and rains in the southwest and continued unrest over the possibility of adverse legislation in Washington affecting

The early sales passed into the hands of Liverpool houses and local spet nouses, with the result that prices rai-ied sharply and at the end of the first of sharply and at the eas of the minutes were 7 to 12 points not higher on new buying, due to a growing belief that the bill proposing to stop puture trading in cotton would not become a law at this session of Congress.

The Census Bureau will issue its report on the consumption of cotton last month at 10 o'clock tomorrow.

OKLAHOMA HAS LARGEST NUMBER OF DIRT ROADS

One of the frequent rows for which the Austrian Reichsrat is noted was punctuated by a warm eulogy of France Massachusetts has the greatest per-centage — 47.6 — of her roads surfaced. Then come Indiana with 42.5 per cent. New Jersey with 40.5, Ohlo with 26.5, Rhode Island with 34.5, Kentucky with punctuated by a warm eulogy of France by a Czech deputy hamed Stanek, according to a report of the November 3 session printed in Die Freie Zeitung of Berne. In the midst of a hot debate regarding the proposed constitution of Galicia into a separate polit cal entity of King Charles's domain, Deputy Stanek said:

"The Czech nation cannot refrain from expressing its warmest sympathy for the noble and glorious France that today is defending her independence and her native soil. France has made civil zantus in the sympathy of the sympathy for high travel with the expensive types of construction used for surfacing in connecticut.

It should be understood that the figures refer to all kinds of surfacing and the property of the sympathy in the sympathy is surfacing and the sympathy in the sympathy is suffacing and the sympathy in the sympathy is suffacing and the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads suitable for light travel with the expensive types of construction used for surfacing in the sympathy is suffacing to class gravel roads gravel road native soil. France has made civil'za-tion her debtor, and we owe to her the greatest progress that the human race has made a ong the road toward hu-manity and fresdom."

Then Deputy Stanek read the protest roads are dirt. Other States with low formulated in 1870 by the Czechs against the annexation of Alsace-Lorraine.—
New York Times.

Per cent. Iowa with 1. Kansas with 1.3, North Dakota with 1.6 and Nebraske with 1.7. The excellent maintenance of many of the dirt roads of Iowa makes riding and hauling over them easy, except during the spring or after continuous rains—Nashville Tennesseean.

the Huns in German Southwest Africa waged a war of extermination against the Cruise. In ophthalmic surgeon with General Haig's forces. Around the front of the regular steel helmet Doctor Cruise has placed a slender rod, to which is attached a strip of steel chain mail, about three inches deep.

This sildes on the rod as easily as a curtain, and it can be drawn like a veil to the source of the Chinese Boxers three years later. In the Huns in German Southwest Africa waged a war of extermination against the Herreros, in the course of which some 300,690 natives and over 5000, Germans lost their lives.

It was the seizure of Klao-chau—a waged a war of extermination against the Herreros, in the course of which some 300,690 natives and over 5000, Germans lost their lives.

It was the seizure of Klao-chau—a friendly power—which led up to the anti-foreign outbreak of the Chinese Boxers three years later.

Autos Enough to Go Around

RECENT LITTLE WARS

Pacifists and other people with German sympathies are fond of telling us that from 1871 to 1914 Germany was at peace with the world; and that, therefore, she cannot be by nature so very fond of fighting.

A new chain visor belimet attachment to protect the soldiers' eyes is being tried by the British in France. The visor is the invention of Captain R. R. Cruise, an ophthalmic surgeon with General Haig's forces. Around the front of the regular steel belinet Doctor Cruise has placed a slender rod, to what the state of the course of which some 300,000 natives and over 5000, Germans lost their lives.

LOCAL STOCK TRADING IS SMALL. WITH PRICES GENERALLY LOWER

Steel Common Makes Up Bulk of Business and Is Off After Selling Unchanged-Transit Certificates and P. R. R. Also Decline

Steel common was about the only issue in which there was any activity trust certificates, on a few, small sale worthy of mention and it showed a wavering tendency, with the price off a half at the end of the first hour, after a half at the end of the first hour, after a kelling at Saturday's close, as against Liberty Bonds were irregular, the selling at Saturday's close, as against selling at Saturday's close, as against a gain on the big board.

Lake Superior Corporation, the most gaining 30-100 of 1 per cent.

Praised by Committee

ontinued from Page One officers of the naval mirtin, officers of the coast guard service, former grad-uates from Annapolis and able men from civilian life as needed.

"Despite the pressure placed upon the bureau of the demands for more ordnance material of standard types, it has been able to develop much new material, including large-depth charges new submarine bombs, nonricochet shells, bomb-dropping sights, howitzers, guns for throwing depth-charges, smoke-screen spparatus, heavier ordnance on a reraft and many other important de-signs, which we feel it unwise to dis-close, and made much progress on es-sential articles of lesser importance.

"Where there were shortages in the market of various materials the bureau took steps immediately to develop new sources of supply. It placed contracts rapidly, and the committee is confident that the navy's needs for ordinance during this war are fully covered by existing contracts and with the capacity now under its control.

"More than 1100 vessels have been furnished and equipped with guns, ammunition, spare parts and all their auxiliaries since the fitting out of the Campana, the first ship to be so fitted out, on March 14, 1517.

WARTIME CONTRACTS FILLED

MARTIME CONTRACTS FILLED.

Reserves of ammunition and shell have been acquired and money placed at the disposal of the Bureau of Ordnance, which has been spent wisely and has been obligated virtually as soon as if became available. The testimony convinced the committee that the prevalent belief and opinion as to the navy's reading for war. Guns, mounts, shells, powder and ordnance equipment in large quantities had been manufactured and held in readiness for eventual use. With the gestaration of armed neutrality guns and ammunition were promptly placed in the merchant ships of the United States. Upon the declaration of war, telegrams long held in readiness were found on the wires and the wheels were found the merchant ships of the United States. Upon the declaration of war, telegrams long held in readiness were promptly placed and motion—without a jar the machinery took up the load placed upon it. There has been no breakdown, no let up, on the contrary there has been increasing speed and greater momestum.

"Congress has provided the bureau promptly with the funds requested, and early in 1917 advantageous contracts were promptly placed and moneys obligated. Today dirtually every dollar appropriated has been obligated, and appropriated has been obligated, and appropriated has been obligated, and the remaining speed and greater momestum.

"Congress has provided the bureau promptly with the funds requested, and early in 1917 advantageous contracts were promptly placed and moneys obligated. Today dirtually every dollar appropriated has been obligated and moneys obligated to the country has reponded in a most satisfactory manner. New can have been entered into entailing fundamental cap and the production of gun for, interesting the production of gun

war had been engaged solely in com-mercial work have been induced to specialize in ordnance production, with most gratifying results. Virtually at the con-tracts made by the Bureau of Ordnance have been on a fixed-price basis as the result of competitive bidding, less than

England, France and Italy with guns from the largest to the smallest caliber, together with proper supplies of ammu-nition therefor, and is continuing the supply of such munitions to our allies. It has armed a considerable number of

their merchantmen.

"Anticipating the needs of the naval service and marine corps for additional machine guns, the bureau wisely conducted a test of the Lewis machine guneatly in April, 1917, with a view to dennitely determining its service-ubility when using the United States small arms ammunition, and as a result of this test phoses are constant. their merchantmen. arms ammunition, and as a result of this test placed an order for the manufacture of several thousand of these guns. Each company of marines leaving for European service has been provided with its proper quota of machine guns, the second detachment being entirely outfitted with the Lewis infantry machine gun, and recent reports from the war zone indicate that this gun is giving entire satisfaction.

"Depth charges, which the committee thinks may be properly termed the terror of the submarine," have been produced in quantity and are in use by our destroyers and submarine chaseers. An adequate reserve of ammunition for all classes of guns has been accumulated and is held in storage ready for the use of the fleet.

INVENTIONS DEVELOPED

INVENTIONS DEVELOPED "It was specially gratfying to note that the skill, ingenuity and inventive resources of the bureau have been productive of new designs demanded by the present methods of modern warfare. "The committee was gratified at the executive ability shown by naval officers placed in charge of industrial work. As an illustration, the bureau found it necessary to commandeer a plant producing binoculars and other optical instruments for the navy. Under the former management this plant produced only 168 standard binoculars in two months, whereas during the first two weeks of operation under navay management it has produced 600 satisfactory binoculars for the use of lookouts and for spotters "The committee found that, despite the necessity of placing large emergency orders for material, every effort has been made to insure reasonable prices. "The committee was supplied with full

There was only a small turnover of stocks on the Philadelphia Stock Exchanged during the first half of today's session and price changes were generally to lower levels.

Steel common was about the only Issue in which there was any activity trust certificates, on a few small range.

using the battery with bravery and skit and was given the details of certain er gagements of special interest.

The arming of merchantmen and the use of other devices, including saling in convoys, while doing much to kee down our percentage of losses, are no all that can be desired as a check to the submarine menace. The committe was furnished with the names, tonnas and armament of all vessels under the American flag engaged in transatiantic trade, together with dates and incident of all encounters with submarines. The record of attacks on our armed marchantmen shows a comparatively small percentage were successful, and that the chances of escape when a submarine is sighted before she has time to fire a torpedo are very high, due to the efficiency of the navy personnel. The unseen torpedo is responsible for 80 percent of the sinkings."

Eighty-four Passenger Train Dropped to Help Move Freight Business

Train service to New York and nearly every local line out of the Rea

Expert Says Most of Loss Is Due Poor Containers An article in Freight Handling a

result of competitive bidding, less than 10 per cent being on a cost-plus-affixed profit basis, cost being as defined by the internal revenue act and .e profit being per pound of gun forgi gs or per gun or per mount.

"It may be pertinent to here state that the bureau has furnished, in appreciable quantities, the Governments of England France and Lity with guns which to pack the goods. nch to rack the goods.

In strong containers, eggs travel saily to this country from liussia, a ditance of 2000 miles, while here, because of weak containers, eggs are damag and destroyed every month to the val of thousands of dollars. Much of the mage occurs when the distance tr eled is not more than 100 miles.
Professor Huebner, of the Universi

of Pennsylvania, is given as the autility for the statement that our railro are wasting annually 209,000,000 empty car space, a vast proportion which could be used if the merchand

"Today the railroads are urging shippers to use strongly built of which would mean thrice the preweight, and threefold charges for c rying them. Even if built strong enough for repeated use, the return freis would bar this, for even on short has

these would exceed the cost of the pr ent fraglic containers.

"Plainly, the first move toward a lution of this problem must come from the railroads, and the mode seems est Let them decide jointly, if possib with the shippers on a standard ty of container of such strength and qu ity as will afford the utmost against all forms of loss and dama and invite and encourage its use by fi transit one way or the same char that are now made on fragile contain

orders for material, every effort has been made to insure reasonable prices.
"The committee was supplied with full information of how many attacks of submarines upon armed merchantment had been warded off by the ships' gun crews, New York Times.

FRAZIER & CO.

We take pleasure in announcing that Abm. Barker Mellor Mellor & Petry

has this day become associated with us.

Mr. Mellor will have a general power-of-attorney
to sign for Frazier & Co.

Sausage From Cottonseed The United States is certainly the "land of cotton." Nowhere else in the world is cotton grown in such abundance and put to such a variety of uses. The fiber, of course, is made into cloth; the oil from the seeds is used as a cheap substitute for oilve oil and as a basis for lard, and now the seeds themselves are being ground into flour and used for food purposes, says the Popular Science Monthly for December. Gingersnaps and jumbles are made from it and it is mixed with fine'y chopped meat and tied in saussage links.
