

CONGRESS WRESTLES WITH FOOD PROBLEM

Definite Legislation Remote Unless President Himself Takes Hand in Solution

MAZE OF PET THEORIES

Appropriation of \$28,000,000 to Help Farmers Taken Up by Senate

WASHINGTON, March 5. Entangled in a maze of conflicting theories, Congress today was floundering helplessly in its effort to solve the food problem of America and the Allies.

Scarcely two members of Congress can be found who agree upon the method of meeting the food question. Each Senator has his pet theory as to what should be done.

Price-fixing of food-stuffs in the United States has resulted in decreased production which threatens to be serious, according to Dr. G. F. Warren, of Cornell University, testifying before the Senate Agricultural Committee.

A very gloomy picture of the future farming situation was given by Dr. Warren, who presented statistics at every turn of his testimony to show that the situation is critical.

By thorough cooperation of city officials with United States health authorities, it is hoped to make life worth living this summer for men at the Philadelphia Navy Yard and the substitutes at Hog Island by the elimination of mosquitoes.

A campaign to eradicate the pests from Hog Island and from the territory occupied by the Hog Island shipyard, has been launched by Director of Public Works Datesman.

The Director will go before Congress Monday and ask for an additional appropriation of \$20,000 to be used in the open battle to be waged on the mosquitoes.

Recently Director Datesman conferred with the officials of the American International Shipbuilding Company and the Government, the conference touching the mosquito situation.

AND POOR HEINZ LOOKED AS IF HE WERE STARVED

State Food Administrator's Trousers Fit Him Too Much at Johnstown Address

The inhabitants of Johnstown, Pa., were shocked the other day when Howland Heinz, state food administrator, appeared to address them upon the topic of the day.

These figures merely prove to us that a low fixed-price increases consumption and decreases production, and shows that we are proceeding along faulty lines.

YEAR-ROUND SCHOOL PLANNED BY GARBER

Would Divide Twelve Months Into Four Quarters With Vacations in Between

Dr. John P. Garber, superintendent of Philadelphia schools, is considering a plan by which the public schools may be kept open throughout the year.

The plan is to divide the year into four quarters, instead of virtually one and allow the students a short vacation between these seasons. "During holiday times," said Doctor Garber, "there are large numbers of students who seek employment in the stores for the rush business.

Yes, it was a purely haze that hovered over the Solwayhill today and when it lifted and drifted lazily toward Conshohocken Simeon Mokemacher poked a hesitating nose through the window of his little Manayunk cabin, which edges the stream and grinned.

After the address Mr. Heinz let the secret out and told T. M. Stackhouse, chairman of the committee of public safety for Cambria county, that he had sent his trousers to be pressed while he took a nap, with instructions to the bellboy that they were to be back at 5 o'clock.

Five o'clock came, but the trousers did not. It was then necessary to summon those of the hotel manager, a man weighing closer to 200 pounds than Heinz does to 100.

Give the Fighters the Animal Fats They Need!

The American Home Has Plenty of MAZOLA—the Pure Oil Pressed from Corn—Wonderful in Flavor and Economy

MANY a housewife—trying Mazola for the sake of saving animal fats—is continuing to use it because it makes fried and sautéed dishes more delicious than butter and lard.

Good cooks know how easy it is to burn butter and lard in cooking and so spoil flavor. They know that Mazola does not easily burn. That it can be used over and over again without carrying the flavor of anything cooked in it.

For shortening it is wonderful. Because it is an oil, it is ready to use without melting. Saves time, works perfectly. Mazola makes a perfect salad dressing, equal in quality to one made with the best olive oil, superior to one made with ordinary olive oil.

Mazola gives uniformly satisfactory results. Its manufacture is an exact science. For sale in pints, quarts, half gallons and gallons. For greater economy buy the large sizes.

There is a valuable Cook Book for Mazola users. It shows you how to fry, sauté, make dressings and sauces more delicious, make light digestible pastry. Should be in every home. Send for it or ask your grocer. FREE.
