Meeting the Emergency

Production throughout the entire country is at the highest notch. To maintain the pace we have set for ourselves-to cope with the demands which the world war has placed upon us-it is imperative, too, that our transportation facilities be maintained at the highest peak of efficiency.

## MOTOR TRUCKS and TRAILERS

have proved themselves fully able to cope with the conditions which have overtaxed even our magnificent railroad facilities. Freight cars are at a premium, and the burden of the long as well as the short haul and local delivery rests on the motor truck and trailer.

They have over-ridden tradition, removed prejudice, uprooted skepticism by rising to the emergency. They have proved horse-drawn equipment to be obsolete, costly, inefficient.

### WHAT DO THEY MEAN TO YOU?

They can mean a broader scope for your business, assured deliveries, economical service, increased capacity. Why not decide to investigate their possibilities-now-to avoid possible increase in price and insure early delivery?
