#### INLY BEGUN TO FIGHT"

eting Secretary Crowell Sets Forth Achievements in Face of Obstacles

### By BENEDICT CROWELL

seretary of War in abrence of Scothe year after our going to war with it is well to pause a moment took back down the road we have ted and ahead on the road we must our starting point of a year perseems so remote that it is hard.

alize that we have come so far. we all remember that a year ago our er was a small volunteer army and minds of the people of the United m were not prepared for any other en The President, however, naw mity the new necessities and, recogthe the essential democracy of the we service system, told us all that w that means and no other could we usfully carry on the burden that been thrust upon us by the organd banditry of Germany. Fortunately the world, the people of the United as had confidence in the President where he should lead, and out est achievement in the way was plished by a word from the great is man in the White House.

Tar Department's Great Problem The massage of the selective service r put the problem squarely up to the far Department. The nation is just ming to see the size of that probas the War Department saw it from a first. The War Department realized it must not talk, but work; that es would be made, but mistakes we must get on with our workt. als counted for nothing, but the k was everything. 1, first as a rk was everything. 1, e officer in the army and then as stant Secretary of War, have seef fine spirit of self-effacement in the

ther homes and the sed fed, equipped and transported, m their homes and then to France, the soing of these things was another and not no simple. The or-

Naval Service 

Total These are all voluntary enlistments and virtually all are made for the full four-year period allowed by law.

Since the war began the Bureau of Navigation of the Navy has pu into commission more than 1000 vessels of all classes, including buttleships submarines, destroyers, transports, hospital ships, patrol vessels, minlayers, mine sweepers, submarine chasers, cruisers, colliers, supply vessels converted yachts, gunboats, etc. This has been an immense task, as the increase of the personnel from 66.900 in January of last year to approxi mutely 300,000 at the present time is composed entirely of raw recrui material, which has had to be trained by the small number of regular com missioned officers. The result has been excellent. Every vessel affort has been and is filled to the maximum complement desired by the pommandin officer.
