American Colors

versus

German Colors At the Textile Exhibition

If you are interested in knowing what progress has been made during the past year in the manufacture of American dyestuffs, we invite you to visit the Sixth National Textile Exhibition which is to be held at the Grand Central Palace, New York, from April 29 to May 11.

This Company has engaged a large corner space on the Fourth Floor and the feature of our exhibit will be a display of dyeings of some fifty "NATIONAL COLORS," alongside of which will be shown dyeings of the same class of colors of German manufacture.

These dyeings have been subjected to the same tests of scouring and fulling and exposure to light and weather for the purpose of illustrating more fully than has heretofore been attempted the exact status of American dyes as compared with similar dyes of foreign manufacture. The exhibit will be of unusual interest to members of the textile trade, to manufacturers of Men's and Women's Wear, and to the general public.

We believe it will demonstrate that the promises of this Company to place on the American market, within a reasonable time, an adequate and comprehensive line of satisfactory colors, is being fulfilled. The exhibit will also be recognized as part of our new war industry and will display the very interesting "bases" or "intermediates" used both in the production of munitions and colors.

Our trade-mark, "NATIONAL COLORS," is the hall-mark of the new American Color Industry.
