Telling the young girl to go without corsets does not assure any mother that her twig is going to be lovely, any more than does telling the young daughter to put on a corset shaped for the woman of mature figure. it is really hard to define which is the lesser of the two evilsa figure bound at the wrong place or a figure allowed to roam at will, for neither one is a thing of beauty

Therefore the conclusion of the whole matter is—if you want your twig to exemplify your pruning it is necessary that you give your knowledge and thought to having the twig correctly consisted. corseted. It would seem that every attention is

You Can Nurse Your Baby Longer

TNSTEAD of weaning your baby at five or six months, you can probably nurse him the full nine months if, when he is little, you substitute one feeding a day of Nestle's Food. It is so like mother's milk that he will feel no difference.

Nestle's Food gives him just that extra strength he needs to help along his growing little body. And when weaning time comes, he will change to the bottle gradually and easily on Nestle's Food.

It is better for the baby and is better for you. Your own health will be better because you are allowed to miss a nursing or two and go out into the fresh air.

WHEN you wean your baby on Nestle's Food you know he is safe, because Nestle's is always the same, always free from germs, always contains just what your baby needs. Don't wean him on raw cows' milk. It has a tough curd the baby can't digest, and home modifying is uncertain.

Nestle's Food is milk, only purer than you get in bottles, with the tough curd made easier to digest, and with just the right amount of sugar and cereal edded. You simply add water to the clean, fluffy powder and boil one minute.

For your own sake and your baby's send this coupon or a postcard today for a free trial package and the 96-page book about babies, by specialists.
