

**VICE PRESIDENT AT VILLANOVA**

Marshall Will Speak at Commencement and Receive Degree

**MARK DIAMOND JUBILEE**

Mass by Apostolic Delegate Begins Second Day of 75th Anniversary

Vice President Marshall will be honored at the commencement exercises and diamond jubilee of Villanova College today.

He will receive the degree of doctor of jurisprudence, rarely conferred by Villanova, and will be the third to receive it. The others were Grover Cleveland and William Howard Taft, each of whom was honored while President of the United States.

Precedents will be shattered when, for the first time in the history of the college, degrees will be conferred on women.

Sister M. Connas and Sister M. Dolores, members of the congregation of the Immaculate Heart, will be thus honored. They will be given the degree of bachelor of arts.

Senator Joseph E. Randall, of Louisiana, who will deliver the address to the graduating class on the college lawn at 2:30 o'clock this afternoon, will be honored with the degree of doctor of laws by E. de Carter, Belgian minister to the United States.

Vice President to Speak  
Vice President Marshall and Minister de Carter will deliver short addresses during the exercises.

Eighteen of Villanova's alumni, two of whom are in the service of the United States, will receive the degree of master of arts. Twelve others, two of whom also are in the service, will be given the degree of doctor of arts, and two graduates will receive the degree of bachelor of science. Three of the latter are in the service.

The concluding event of the exercises will be the meeting and banquet of the Alumni Association in the college dining hall, preceding which there will be the raising and blessing of a service flag with 245 stars. Chaplain George J. Waring, a captain in the Eleventh United States Cavalry, for many years in active service, will be the speaker on this occasion.

The Rev. A. J. Plunkett, '06, will be toastmaster at the banquet.

Mass by Apostolic Delegate  
Solemn pontifical mass was celebrated at 9 o'clock this morning by Archbishop John Bonzano, Apostolic Delegate; the Rev. Charles M. Driscoll, provincial of the Augustinians in the United States, was assistant priest; the Rev. James F. Green, president of St. Rita's College, Chicago, was deacon of the mass, and the Rev. John S. Leonard, prior of Villanova Monastery, substituted.

Deacons of honor were the Rev. James T. O'Reilly, rector of St. Mary's Church, Lawrence, and the Rev. E. G. Dohan, rector of St. Joseph's Church, Greenwiche, N. Y., formerly president of Villanova.

The Rev. George S. Walker and the Rev. Charles J. Melchior were masters of ceremonies.  
Archbishop Bonzano was assisted by the Rt. Rev. Philip R. McDevitt, of Harrisburg; the Rt. Rev. Michael J. Heenan, bishop of Scranton, and the Rt. Rev. John J. Monaghan, bishop of Wilmington.

The Rev. John I. Whelan, class of '03, editor of the Brooklyn Tablet, delivered the jubilee sermon. Luncheon in the college dining hall followed the morning services.

College Seventy-five Years Old  
Edwin Stanford, bachelor of arts, will deliver the salutatory at the commencement exercises. Joseph J. O'Leary, bachelor of science, will be valedictorian.

The Rev. Francis A. Driscoll, vice president of Villanova, will present the candidates for degrees and the president, the Rev. James J. Deap, will confer the degrees in the name of the college.

The commencement today rounds out Villanova's seventy-fifth year of educational work.  
From a small beginning with a small staff of teachers the college has enlarged its courses and branched out in its endeavor until today it is among the foremost Catholic colleges of the country.

**AUTO THIEVES ACTIVE**

One Car Abandoned When Policeman Interrupts Robbers  
A band of automobile thieves have resumed operations in the northern section of the city. One stolen motorcar was recovered today.

Early today the garage of Lewis Darvin, 228 Sheldon street, was broken into and a motorcar valued at \$1,800 stolen. The automobiles of police sergeant Joseph Gannon, of the Twelfth and Pine streets station house, was stolen from a house on the corner of North and Pine, 3121 North Camac street.

Patrolman Muller spied the thieves on the Old York road as they were about to strip the machines of their tires. The men jumped into one of the stolen automobiles and escaped. Sergeant Gannon's car was recovered.

**TO DECIDE ON JUDGES FOR SUPREME COURT**

Republican State Organization Will Pick Candidates at Conferences Here

At conferences to be held here Thursday and Friday the Republican state organization will decide what is to be done in the matter of the two Supreme Court vacancies to be filled at the November election. These vacancies were caused by the deaths of Justice Potter and Westcott. Two weeks ago Governor Brumbaugh named Alexander Simpson, Jr., to succeed Justice Potter, but he has made no announcement relative to the other vacancy.

State Treasurer Harmon M. Kephart will be on hand Thursday to take up the cudgel for his brother, Superior Court Judge John W. Kephart, who stands well with many of the State leaders, not only of the Penrose wing, but also that of the Yares. Friends of Judge George A. Kunkel, of Dauphin County, will also urge consideration of his name. Judge Kunkel, however, may not be a candidate. As judge of the Dauphin county court his salary is almost equal to that of a Supreme Court justice.

It may also be urged upon organization leaders that they endorse Justice Simpson to succeed himself. It is absolutely certain that Judge Kephart will be a candidate in the fall, however, no matter who receives organization endorsements.  
Democratic leaders at their meeting in Harrisburg June 19 will also register their choice for the Supreme Court. It is expected they will suggest only one candidate in the hope that the undivided Democratic vote in the fall will place a man on the bench.

**REA TO LOSE HIS SUITE**

Government Takes Over Offices in Broad Street Station

There is to be a rearrangement of offices at Broad Street Station and Samuel Rea, until recently operating head of the Pennsylvania Railroad, is booked to lose his suite.  
Orders by the office of Director General of Railroads May 26 have embodied in a notice to President Rea, who is now, by the operation of the general order delimiting the executives of the railroads to the functions simply as heads of the corporate body of their respective systems, removed from the de facto control and operation of the physical properties of the corporation. President Rea will be required to vacate promptly to provide room for the Federal Administrator and this ruling will apply to all representatives of the corporate body not remaining essential to the conduct of the road under the federal personnel.

**PENNY CAUSES KILLING**

New York Elevator Operators Quarrel Leads to Stabbing

New York, June 11.—Following a fight over a penny, Paul Rivers, seventeen years old, an elevator operator, is under arrest here charged with homicide. He is accused of killing George Green, nineteen, a fellow elevator operator. Rivers declared that he did not intend to kill Green. When Green went to work at the hotel Rivers, it is charged, met him and asked him to change four dimes. Green, it is said, gave him three nickels and twenty-four pennies. A fight then started, it is said, over the other cent. Rivers stabbing Green with a knife.

**MAKE FRANKFORD BIGGEST ARSENAL**

Appropriation of \$1,069,000 Means Many Improvements

**WILL ENLARGE CAPACITY**

An appropriation of \$1,069,000 for big improvements at the Frankford Arsenal is contained in the sundry civil bill favorably reported to the House Appropriations Committee.

This appropriation is the largest given to any arsenal in the country. It is one-fifth of the total amount appropriated for all arsenals and armories. The improvements to be made with this money will make the Frankford Arsenal the largest ammunition supply station on the Atlantic coast.

There is included in this sum \$400,000, which will make possible a two-thirds increase in the output of small arms ammunition, boosting the present production of 3,000,000 rounds a week to between 4,500,000 and 5,000,000 rounds.

Another improvement provided is a private plant to generate all its motor power, to avoid the possibility of a curtailment of its output due to any scarcity of fuel and the consequent shutdown of private electric-generating plants. Although there is a big power plant at the arsenal at present, it is not large enough to supply all the power needed. As a result, the arsenal is forced to depend on the electric utility company for some of its power. With the necessary improvements, involving an expenditure of \$205,000, the arsenal will be independent of outside sources for motive power and will be able to operate uninterrupted, no matter what fuel conditions may be, since Government plants have priority in fuel deliveries.

Increased fire protection needed at the arsenal led to the request for \$94,000, which was authorized in 1917 for assembling artillery ammunition. Since then no work has been done. It is devoted to improvements to the existing plant building. Two sets double quarters for the arsenal are needed, one for \$100,000; increased facilities for the storage of artillery ammunition brought \$100,000; additional sewage, \$50,000; repairs and reconstruction of the sea wall near the arsenal bill, \$20,000; a charter ship building is estimated at \$150,000; extension of the arsenal, \$30,000; and a lumber storehouse, \$30,000.

An appropriation of \$150,000 for construction of work in making a thirty-foot channel in the Delaware River, extending from the foot of Allegheny avenue and involving the removal of Mammoth rock, is also included in the bill. A hoisthouse on Reedy Island, in the Delaware, under the marine hospital and quarantine service, was granted \$400,000. An unexpended balance of \$40,000 for a lighthouse and fog signals at the Joe Floger shoal, in the Delaware River, was authorized to be spent for the purchase of the building. It has been found impossible to erect a lighthouse.

**"GARABED" BOBS UP AGAIN**

Armenian Inventor Says Machine Work Is "Excellent"

Washington, D. C., June 11.—The Department of the Interior has received assurance from G. T. K. Giragosian, the Armenian inventor or discoverer of the so-called "Garabed" with reference to the secret official test to be made in Boston under congressional authority in the National Army Morgue, designed to supplement steam, electricity, gasoline and water power. The message ran: "My work excellent. Can write definitely Wednesday."  
The resolution authorizing the invention to make, at his own expense, in the presence of five eminent scientists to be approved by the Secretary of the Interior, a test of the invention, which, if successful, would give exclusive rights to the inventor, was approved several months ago. Then the test was deferred so often that Secretary Lane recently gave Mr. Giragosian two weeks within which he could begin his trial and governmental supplies. Just before the two weeks expired the Secretary practically extended the time by asking the inventor to make some definite report of progress. The only answer seems to have been the brief telegram received today.

**To Graduate at Hammoniton**

Hammoniton, N. J., June 11.—The graduating class of the Hammoniton High School this year comprises Alameda Adams, Virginia Adams, Harry G. Batchelor, Katharine Bowen, Katherine M. Brownlee, Gertrude H. Graig, William T. Crescenzo, Viola B. De Bow, J. W. Eckhardt, Esther H. Elmer, Edward Foglietto, Margaret Foster, Marie T. Gennip, Genevieve G. Gray, Elsie B. Harte, Elma G. Hoffman, Helen G. Leek, Marie McGovern, Ethel Rebecca Myers, Marmie Santoro, Charles N. Thompson, Winifred N. Weeks, Elsie M. White and Helen Gertrude White.

**Seaplane Falls Into Ocean**  
Atlantic City, June 11.—Government seaplane 926 dropped from the clouds one mile off Barnegat when it became disabled yesterday. A seaplane hurried to the rescue. Engine trouble caused the mishap. A patrol boat towed the seaplane to Atlantic City.

**BOYS ADMIT U. OF P. THEFT**

Youngsters Accused of Stealing Jewelry From Dormitories  
Joseph McGuigan, twelve years old, of Thirty-first street and Columbia avenue, and Harry Gruensger, thirteen years old, of North Thirty-fifth street, were sent to the House of Detention today accused of breaking into Forty-fourth and Spruce streets. When the detective approached the boy ran. Thornton caught him after a chase of several squares and when taken to the station house some of the missing articles were found in his possession.  
After being questioned young Gruensger admitted the theft and implicated McGuigan. Detectives arrested him at Eighteenth and Oxford streets early today.

**Large Mail Loss on Carolina**

Washington, June 11.—When the Porto Rican liner Carolina was sunk by a German submarine off the New Jersey coast yesterday, mail contained in 40,000 letters, forty-two sacks of newspapers, fifty-four sacks of parcel post and 274 registered articles, mailed throughout the islands between May 28 and 29, was lost. The Postoffice Department announced today.

**MILLS KEEPS SILENCE ON U. S. LIQUOR RAIDS**

Acting Police Head Not Consulted Before Justice Department Acted

Acting Superintendent of Police Mills declined to comment today on the action of the Department of Justice agents in raiding twenty alleged speakeasies without consulting the co-operation of the police. Several arrests were made and a large quantity of intoxicants was confiscated in the raids, which started Saturday and ended late yesterday.  
Asked if the policy would follow the Government action by conducting a similar campaign of raids, Mills said the "police have been fighting speakeasies for some time."

"No report of any raids has been made to me," he said. "Until I see such a report I have no statement to make."  
After closing the alleged speakeasies the Government agents visited a number of German clubs. At one of these they found a policeman in uniform drinking at the bar.

At each of the clubs visited alien enemies were required to show registration cards as were all men eligible for service in the National Army. Two men engaged in conducting a photograph establishment on Ninth street above Market were arrested on the charge of supplying intoxicants to men. One of the men and his wife were accused of conducting a disorderly resort.

**SCREWS TO BE MADE ON FIXED STANDARDS**

Threads in Future Will Be on Identical Lines and Easily Duplicated

By a Staff Correspondent  
Washington, June 11.

The five members of the Commission for Standardization of Screw Threads will be appointed in a few days and the fixing of standards for all screws and nuts which has been urged by engineers everywhere for more than a hundred years will be near consummation.

The importance of this development may be better realized when it is known that the number of screws manufactured in the United States every day is more than 100,000,000. This includes only screws to fit a nut and not wood screws for which there is no need for standardizing.

Congress passed a bill a few days ago forming the commission, which is to be composed of the Director of the Bureau of Standards, an army officer, a navy officer and two members to be appointed by the Secretary of Commerce, one from the American Society of Mechanical Engineers and one from the Society of Automotive Engineers.

The bill provides that the commission shall fix standards for screws and nuts for use in the plants under the army and navy and for specifications for these departments by private concerns.

There are at present innumerable standards for screws and nut tolerances with the result that when a screw or nut breaks or is lost it is often very difficult to obtain another part to fit. It is believed all manufacturers will eagerly adopt the provisions of the bill, although it carries no penalty for failure to do so.  
The automobile manufacturers recognized the need of standardization of screws, and a few years ago adopted definite standards so that all automobile screws and nuts now fit all makes of cars.

To the ordinary individual all screws and nuts appear very much the same. But there are five different measurements for each screw. First, there is the lead, meaning the number of threads

per inch; then the angle between the threads; then the diameter, from crest to crest and from groove to groove, and from the center of the thread on one side to the center of the thread on the other.  
The lack of standardization of screws has interfered in an all too small way with the rapid manufacture of war munitions for the army and navy, especially in airplane manufacture, and the general public, which now is aggravated by failure to obtain duplicates of screws lost or broken, will welcome the establishment of fixed sizes.

**8700 IGNORE SUGAR ORDER**

Inspectors to Hunt Hoarders Among Negligent Manufacturers

Food administration inspectors here will conduct a searching investigation to uncover sugar hoarders, suspected because of the small number of manufacturers who have filed sugar certificates recording their holdings.

Although yesterday was the last day on which these certificates, stating the supply on hand and the estimated requirements for the next six months, could be filed, only 1300 of the city's 10,000 manufacturers who use sugar in their products observed the ruling.  
As failure to file reports prohibits the obtaining of sugar supplies after July 1, 8700 of these manufacturers will either be without sugar, or be subject to suspicion of hoarding.
