

# Philadelphia Must Build the Ships to Win the War

**Ships to transport a million fighting men to the battlefields of Europe.**  
**Ships to carry food to our armies and their allies.**  
**Ships to replace the bottoms sunk by Hun submarines.**  
**Philadelphia is answering the call right manfully. Already sixteen mammoth shipyards are in operation along the Delaware.**  
**They must have men—a vast army of skilled mechanics and artisans to build the ships which will insure the success of the war.**

## This Is Your Opportunity, Workers of Philadelphia

Serve your country and advance your own interests by throwing your whole heart and energy into the work that lies ready to your hand.

Turn a deaf ear to the "lure of the elsewhere"—the glittering promises that higher wages and an easier job await you in some other town.

The opportunity of a lifetime lies at your door right here in Philadelphia.

If your skill and training fit you for shipbuilding, offer your services to Uncle Sam. He will give you the best job you ever had at top-notch wages.

If you are not qualified for this branch of service, **STICK TO YOUR PRESENT**

**JOB.** If you leave town, your place must be filled by a man that is sorely needed on war work.

And by sticking to your job here in Philadelphia, you are advancing your own best interests. Your employer will appreciate your loyalty and reward your efforts in the common cause.

Make Philadelphia your permanent home. No other city offers the worker so many advantages. Nowhere else can you earn such high wages—or save as much money. In no other city will you find such ideal living conditions, such good working conditions.

## Stick to Your Job in Philadelphia, the City of Opportunity

This Campaign Is Supported in the Interests of the "Win-the-War" Movement by the Following Manufacturing Interests, Financial Institutions, Firms and Individuals:
