The situation was brought to the front motion says:

"The present condition of Austria cannot last. Democracy is a modern necessity, but democracy is impossible in a
state whose national life is paralyzed
by the continual struggles of eight separate peoples composing it, and where
national representation, divided by racial interest, falls a prey to the bureaucracy. "Democracy will only be possible in Austria when the country is transformed into a confederation of free nations. In imo a confederation of free nations. In enemy countries, Austria, as at present constituted, is regarded as an eternal impediment to the liberty of the peoples of Europe, which must be destroyed. Austria should show that she is capable of reforming herself on a liberal basis. As a democratic confederation of peoples, she could secure an economic peace more easily."
