

# Laborers Are Paid Ten Dollars a Day in Alaska, BUT---

When they pay Alaska prices for food and lodging—their big shiny dollars look like thin dimes.

While dollars per day is a big question—it isn't the BIGGEST question in selecting the community where you and your family will seek the necessities, and some of the comforts and pleasures of life.

*Let's see what Philadelphia offers the average man and his family*

First—Is the Problem of selecting a place to live.

Philadelphia is a big city. But thanks to municipal enterprise, it has all the advantages of big city life.

The man who works for wages in Philadelphia may expect to find a comfortable modern dwelling, with a real yard, and a garden plot, at a rental within his means.

Or better still, an opportunity to OWN a home on a mighty small down payment.

Crowded tenement life is almost unknown in a community where excellent car service connects factory and homeplace.

AND RECREATION—That's a necessary part of our daily life.

Philadelphia's magnificent park system is a playground free to young and old. Municipal bathing, boating, baseball and football invite thousands to healthful outdoor sports.

WORKING CONDITIONS—Bread-winners must consider that Philadelphia employers have been pioneers in the erection of factories constructed to conserve the health and comfort of their employes.

Daylight workrooms with the maximum of light and air, with every device for the safety and comfort of the workers, are the rule in Philadelphia.

The pay envelopes are well filled in Philadelphia these days  
 Your productive skill brings a dollar reward above the average  
 But look beyond the pay envelope  
 You'll get the most out of every hour of work or play in Philadelphia
