Near died. -Richard Wightman, in Pictorial

It is time for every woman to take strict inventory of her own possibilities. If family conditions permit, let her go out and take a job. It should really be a case of "work or fight" with women, too. If they are not engazed in the important business of rearing families that actually occupies all their time and energy, let them seek work that will occupy their energies. If they go in for Red Cross activity, let them forget how the cap looks, forget to watch the clock, and go home really tired, after a day of it. Running in for fifteen minutes and upsetting every one's work with gossip is surely more or less trifling Let them be faithful and regular in

If I were to say to you, "I saw a camisole today for a dollar," you would probably reply, "Well, there's nothing unusual in a camisole at that price." But, you see, this was unusual because it is an exceptionally pretty piece of underwear. An edging of filet design lace is duplicated in insertion from which it is separated by a band of pink. The bottom is of delicate pink satin, and the ribbon shoulder straps are of pale blue. And the nice part of this is that instead of slipping on over the head, it buttons down the front.

Day after day as I went past the shop. I stopped and gazed longingly at the bright green hat, and tried to convince myself that I needed it, when I knew down in my heart that I did not.
