## BRITISH FIREMEN STRIKE

### Walkout in "Black Country" Brands War Workers and Miners

*By the United Press*

**London, Sept. 25.**—Railway firemen in the north central manufacturing district, known as the "Black country," went on strike today.

Thousands of munitions workers and miners are stranded and unable to report for their work. Freight traffic has ceased entirely. The strike is spreading rapidly.

The Government has directed the military and naval authorities to assist the railways in transportation of munitions and war supplies.

The Government may militarize all the railways in Great Britain, as a result of the strike in the South Wales district, it was reported today.

The strike is extremely unpopular. Even the radical press condemns it. Belief is expressed that the majority of citizens would support the most drastic governmental action, along the "work or fight" lines laid down by President Wilson.

Announcing the Government's intention to use the military, if necessary, Sir Albert Stanley, president of the Board of Trade, said:

"The Government is fully alive to the situation and is determined to maintain service to protect those remaining loyal to the country's interest in this greatest crisis."
