Heavy German counter-attacks were delivered over most of the Champagne front Saturday afternoon. At least ten new battalions, including one of the conflict. The Kolnische Zeitung learns from parlamentary circles that Von Capelle's successor will be Vice Admiral von Mann, who is at present chief of the submarine department in the Admiralty. This paper points out that Von Mann was a director of the Germania docks for a short time before the war, and later came before the public as leader of the Deutschland on her first trip. The same paper states that Von Mann was to receive members of the Reichstag main committee in confidence yesterday, and to impart important information on the U-boat and naval warfare.

THE largest collection of beautiful furniture and furnishings; everything required to make every type of home artistic, attractive, comfortable and truly homelike-and all assembled under one roof; the roof that covers America's largest furniture Store. This magnificent stock was contracted for many months

ago; before the heavier price advances; before the Government demands upon labor and materials curtailed production so sharply. There is less furniture being made today, perhaps, than for many years, and particularly so of the finer kind of furniture, furniture of distinctive design that cannot practicably be standardized or reproduced in quantity. And with this distinctive, unusual furniture (as with every good kind) our Store is well stocked; the prices are surprisingly moderate; the opportunity to indulge your personal preference, unequalled. A visit here reveals the whole art of homefurnishing, and is besides a lesson in real economy.
