Coal Conservation

As members of the National Coal Merchants' Association, we have been asked to give publicity to the following letter:

September 14, 1918.

To the Consumer :-

We feel sure that you wish to do your share of the War Work, and the most important of this work just now is economizing on coal. The welfare of a community is dependent upon each individual citizen, and we, therefore, ask your co-operation in this to the greatest possible extent.

In order to do this we ask that you refrain from using coal in furnaces or stoves entirely at least until the first of November and longer, if possible, using wood when a fire is necessary.

Fuel Administrators and Committees are the local representatives of the United States Fuel Administration. It is impossible for them to be in all the homes all of the time. Will you, therefore, be a representative of the United States Fuel Adminstration in your own home, and do this work cheerfully as part of your War Work?

The demand for coal is much greater than the supply, and if much suffering, sickness and discomfort is to be avoided, the most stringent economy in the use of coal must be practiced by everyone.

> Yours very truly, NATIONAL RETAIL COAL MERCHANTS' ASSN.

An infectious appearance of warm comfort emanates from a fur-trimmed suit of velour. Even the little furhall ends of the throw-over belt seem cozy, while the kit-coney collar and the band at the bottom of the jacket are quite luxurious. Tiny stitched tucks, vertical inset pockets that are perfectly tailored, and an odd arrangement of the collar, which can button high, make for distinction and exclusiveness. The model is in black or taupe.
