MORBID FEARS AND COMPULSIONS

Described by the Naturalist A Readable Discussion of Their Motivation in Sex and Hunger

One must be cautious in commending The lover of birds will find much to enjoy in this account of nearly six the observations and theories of any years of exploration in the "great won-writer on a trend of scientific thought which over 150,000 miles were covered. As yet in its swaddling-clothes, such as The author, Leo E. Miller, of the Americant the psychoanalytic movement, yet for The author, Leo E. Miller, of the Allice of the Colored Roosevelt. Their daring to observe that Dr. H. W. Fink's was that of Colonel Roosevelt. Their during to observe that Dr. H. W. Fink's purpose was to collect birds and main-mals; also to study the fauna, flora, to-pography, elimate and human inhabi-serving of the attention of all such inthe club foot tants of the regions visited. His special interest was the birds, and his nar-rative is largely devoted to descriptions of their infinite varieties, numbers, in some of the more highly theoretical ablis and nests. Some of these nests parts of his book he has elected to folwere "five or six feet across and contained hundreds of pounds of material," does not hesitate to borrow even the does not hesitate to borrow even the work of the huge structures to the breaking point. He also gives a great deal of valuable and interesting information in regard to the whole life of the regions visited, which included practically all the South American republics. In some places he was brought into close contact with native Indians who have scarcely any intercourse with the whites. In one little known country he ties. Any quarrel with Doctor Pink is thus of necessity a quarrel with the whites. In one little known country he found some whose "weapons are bows and arrows, the former of great height and so powerful that they cannot be drawn with the arms alone. In order to shoot the Indian throws himself on his back, grasps the bow with the feet and draws the cord with bands," the struck in reading this volume to shoot the Indian throws himself on the writer arrives at in weighing his clinical material. It is to be expected that he too, like Freud, will be questioned by students with the constant of the processing the structure of the processing the processing of psychological psychologi and draws the cord with both hands." that he too, like Freud, will be questioned are seven or eight feet long. It loned by students of the psychoanalytic movement for having made so much of account of his varied experiences is that South America is absolutely different from all the other continents. The rainfall, for instance, in paris is 400 inches annually, and the Orinoco, way inland, becomes 120 miles wide during the wet season. This, the heat and the cases of aberration, must needs apply to those investigations of Doctor Fink. He

the wet season. This, the heat and the cases of aberration, must needs apply to resistless venomous insects and any these investigations of Doctor Fink.
