"Hello. Philly" is their sons—
Till the o'd ship brings them safely home

to those who are keeping in close touch with the market.

Before Thanksgiving the birds reached probably the highest price on record in this part of the country and brought as high as sixty and sixty-five cents a pound. Rather than pay this figure, however, thousands of housekeepers compromised and bought chickens, which sold at forty and forty-five cents. This caused a siump in turkey prices, reducing the birds from ten to fifteen cents a pound on the day before Thanksgiving. It was too late, however, to dispose of most of them. Thousands were left on the market.

Nineteen States will ship carloads of turkeys for Christmas and with those raised nearby there is a every indication that the supply will be equal to the demand thus bringing the price down to the reach of the normal pocketbook.

#### It Always Was a Fighting Name-Lexington

Remember the Minute Men of Lexington —the scrappiest, gamest, readiest set of fighters in the history of the world's wars. In the war, just finished, with Germany. the Lexington Motor Company-true to the traditions of its name-went to war with its entire energy.

"No more Lexington passenger cars until that bird known as the Kaiser is extinctus defunct, i. e., down and out," we said. Which he now is.

The steady, increasing stream of production of Lexington cars was, therefore, temporarily interrupted.
