SWEET potatoes are the roots or tubes of a vine-like plant; it is a native of tropical climate, but it is grown in States as far north as New York. The delicious yams of the southern States and the West Indies are made into many attractive in foods. The food value of the sweet potato is closely allied to that of the white potato, but it contains from 4 to 10 per cent sugar, where the ordinary white potato has no sugar. And then, too, this common vegetable will provide a variety of

Inexpensive Desserts

The fact that eggs are high-

priced makes many a housewife sigh and ponder about how to squeeze in an appetizing dessert on a slender table allowance. To such women Mrs. Wilson's home-cooking article tomorrow will prove a real friend. In it Mrs. Wilson gives ome of the recipes in use at the Naval Cooking School, which she onducts at the Philadelphia Naval Home in this city. That they are economical is best proved by the fact that they come within the law of the navy ration. To be very specific, Mrs. Wilson tells how to make four delicious desserts for sixty-five cents. But there was one of those swell affairs. Plenty of Siris, and sociable, too. But there was something that would keep me from dancing with a girl who would look at me every now and then and smile at me, I was afraid to ask her to dance with me, thinking there were other betterlooking boys than myself for her to dance with. But after a while I took courage and asked her, rather against my will. While dancing she told me that she had thought I didn't know how to dance. But Dear Cynthia, that wasn't It. I was only bashful or something. That's the point I can't really make clear.

Here of late I think that my looks are getting usiler every time I look at myself in the mitror. Therefore, I am even ashamed of myself. I was never like this before. Every time I would meet a girl I would think that I was sgood-looking and all that, and I wasn', a bit ashamed to talk to girls, either, I am so unlucky in meeting girls that sometimes it makes me feel miserable.
