SHOW AT NATIONAL A. A.

This is the last chance for the boxing fraternity to pay its tribute to the memory of the late Jack McGuigan, the man who did so much to place the ring

attendance.

Eight bouts and one exhibition will make up tonight's banner program at the National A. A. Each bout is scheduled to be a three-round, three-minute affair. All of the principals have purchased tickets, both for themselves and for one second. This is something very unusual, but the volunteer entertainers insisted upon this method of expressing their appreciation.

Our Prices and Our Policy

The list prices of the Paige five-passenger Six-39 and seven-passenger Six-55 models have been definitely fixed at \$1555 and \$2060 respectively. These prices are based upon the present cost of high grade materials and skilled labor. It is our conviction that there can be no further reduction in motor car prices for many months to come.

As every business man knows, labor is the element which determines the cost of any manufactured product. It is, in final analysis, more than 90% of a production investment. A ton of ore in the ground is worth 75 cents. When it has been mined, transported to the mill, converted into steel, forwarded to the machine shop and fashioned into automobile parts, it is worth \$1500. And practically every penny of the enhanced value is a labor charge.

So it is quite evident that the cost of labor must come down before commodity prices can be reduced. Furthermore, it must be a general reduction of the wage scale—a National movement. And the process, as we see it, is going to take a long time.

The skilled workman you must remember is no longer receiving a "war wage." He is well paid to be sure, but no man has a better right to fair compensation, and he will undoubtedly continue to receive it. Where, then, can the manufacturer look for a reduction in his manufacturing costs?

As we have said, the list prices of our cars have been definitely fixed. These prices represent intrinsic value—the choicest of manufacturing material and highly skilled workmanship. Without a sacrifice of our own quality standards it would be absolutely impossible to produce such cars for one dollar less.

The point we want to make is this: We could not afford to build and you could not afford to buy on any other than a quality basis. In brief, while we agree that first cost is an important consideration, we are convinced that Ultimate cost is vastly more important.

We believe that the only true test of economy is years of hard, gruelling service on the road.

We believe that freedom from repair bills and excessive depreciation is infinitely more desirable than a mere catch-penny list price.

These are our convictions. We have held to them staunchly during many fitful periods in the motor car industry. So long as the Paige Company is a factor in the making and distributing of motor cars we shall continue to adhere to them.
