Business history records no greater human weakness than that which permits the installation of a filing service wholly unsuited to fit the need for which it was purchased.

No such condition has ever been known to exist where an Amberg indexing plan was installed and maintained. This success is based on the Amberg policy of judicious sales service which permits an Amberg installation only after the requirements of the business have been satisfactorily determined-to which the filing plan is then fitted.

For over half a century the name of Amberg has symbolized the acme of perfection in indexing and filing service. A leadership of such duration can mean only one thing.

An Amberg Analysis will show how the basic laws of indexing can be applied to the filing problems created in your business. Amberg Cabinets, wood and steel, are standard and the Indexes fit any make of cabinet
