You may be able to defend yourself from a frontal attack, but how about it if you are held up from the rear?

Your body has to fight constantly against disease. It isn't always a fair fight, because constipation is a treacherous enemy that you usually don't recognize until too late.

Stagnating, poison-forming food waste in your large intestines, helps disease to attack you and hinders you from defending yourself. Such selfpoisoning causes over 90% of human illness.

You may be held fast for months in the grip of constipation, trying vainly to free yourself by taking castor oil, pills, salts, mineral waters, etc., in order to force the bowels to move. Not only will the constipation grow worse with the continuance of such remedies but you will be less able to defend yourself against the attack when

## A Wise Man Doesn't Take Chances With His Clothes

Too much depends upon his personal appearance for him to risk getting inferior quality in the clothes he buys. The best plan is to go to a store where he knows that every coat and suit he sees is pure wool, carefully tailored; then he can't make an error in judgment.

There's no chance for such an error in the Down Stairs Store for men. The clothes are right, the prices are right.
