Besides being made in all conceivable shapes, they have a number of unusually good points, the principal one being the lack of points, no abrupt, hard-to-keep-clean angles, every piece having smooth curves easy to wash and wipe. The handles, with no sharp edges to cut the palms, are water-tight, and never rust nor work loose. No overflowing food gets on the hygienic lids, with their upturned edges, and when covers are attached they fit without wabbling.

Plea Shows Need Lendon, March 14.—(By A. P.)—Commenting on Secretary of State Robert Lansing's address at Paris on Tuesday night, in which a plea was made for supplying Germany with food, the Chronicle says:

Chronicle says:

"The crucial difficulty is tonnage, and the only way of quickly expanding the available tonnage is for the United States to restore to interallied use American shipping which she withdrew last autumn. We especially welcome Mr. Lansing's speech because it ought to mean, if it means anything, that a substantial part of this tonnage, which went to the South American trade, will once more be at the service of starving Europe."
