

THE RIGHT WAY TO PLAN MEALS—COURTING THE YOUNG MEN—DAINTY ORGANDIE—CYNTHIA

MRS. WILSON EXPLAINS ABOUT FOOD VALUES

There Are Five Different Kinds, All of Which Ought to Be Included in Every Well-Balanced Menu

EVERY ONE knows that when wood is burned in the stove it furnishes heat, and that only a few shovelfuls are left as waste or ashes...

Ask Mrs. Wilson

EVERY ONE knows that when wood is burned in the stove it furnishes heat, and that only a few shovelfuls are left as waste or ashes...

First, you must divide the food in five groups: Meats, fish, eggs, cheese and legumes, which include peas, beans and lentils...

Mrs. Wilson Answers Questions

My dear Mrs. Wilson—Will you kindly tell me in your columns of the EVENING PUBLIC LEDGER the quantity of vanilla beans required to make twelve quarts of ice cream and how to use same?

Usually one tablespoonful or one-half ounce to two quarts; this would mean that you would require about three ounces to twelve quarts...

Dear Mrs. Wilson—Have found pleasure in reading your recipes in the EVENING PUBLIC LEDGER and have met with success in the use of the same...

Chocolate Marshmallow Filling Place in saucpan One cupful of sugar. One-half cupful of white corn syrup...

Bring to a boil and cook until mixture forms a soft ball when tried in cold water or about 240 degrees Fahrenheit on candy thermometer...

Beat with Dover egg-beater to thoroughly blend, pour in greased pudding dish and bake forty minutes in slow oven...

My dear Mrs. Wilson—I saw in the EVENING PUBLIC LEDGER about ten days ago that you intended giving some recipes for cream sauces...

Will you kindly explain in the column? I have tried a number of your recipes and they are very fine...

Use Dover egg-beater and meringue or beat until very stiff. Your meringue is vague and, as I do not know in what manner, you wish to cook whites, I cannot give you a definite answer...

The Woman's Exchange

Let Coin Dealer See This to Judge It To the Editor of Woman's Page:

DAILY READER. A 175¢ penny may be worth anything from two cents up to a dollar or more...

Decorations for Anniversary Dear Madam—Will you kindly suggest table and room decorations also...

Likes Adventurers With a Pursue Dear Madam—First I want to tell you in a few words how much help your "Adventurers With a Pursue" has been to me...

A Tenant's Rights Dear Madam—Will you kindly give me information on the following questions: our house has been sold and we were given notice to move...

Puppy Found a Home Dear Madam—I wish to thank you very much for finding a home for my puppy...

Flowered Organdie Is Very Popular

A Daily Fashion Talk by Florence Rose

This little dress is made of organdie with turn-back collar and cuffs daintily embroidered. The broad tucks on the skirt lend themselves particularly to the sheer and crispy material...

Last season we had organdie and this year it is coming back stronger than ever. That seems to be a rather odd statement to make at this time...

Will you kindly explain in the column? I have tried a number of your recipes and they are very fine...

Use Dover egg-beater and meringue or beat until very stiff. Your meringue is vague and, as I do not know in what manner, you wish to cook whites, I cannot give you a definite answer...

My dear Mrs. Wilson—I have been reading your recipes and have tried a good many of them. Will you kindly tell me how to can with the hot-water bath?

Bring to a boil and cook until mixture forms a soft ball when tried in cold water or about 240 degrees Fahrenheit on candy thermometer...

Beat with Dover egg-beater to thoroughly blend, pour in greased pudding dish and bake forty minutes in slow oven...

HOW TO GROW ROSES

Every one loves roses, but a great many are afraid to try to grow them. You can surely be successful if you follow the rules given below.

EVERY one wants roses. We all acknowledge that a garden is never complete without them...

Before planting cut away most of their tops. After you have placed them, firm the soil about their roots...

This phase of rose culture is in all cases regulated by the habit of growth of each particular bush. Generally speaking, all weak shoots are cut back...

Roses must have soil especially prepared for them. Dig the soil to the depth of two feet. If you are suspicious that the drainage is not good...

A trench on the surface aids greatly in preventing the soil from drying out quickly. For middle use Bordeaux mixture or sulphur. For aphids, or plant lice...

And So They Were Married

By HAZEL DEYO BACHELOR Copyright, 1919, by Public Ledger Co.

START THIS STORY TODAY

In spite of her mother's proffered explanation of her remarks she somehow failed to convince Ruth that her intent had not been to make Ruth discontented with her marriage...

Just about now another strange thing happened to Ruth. Into the rather poisonous atmosphere that Fletta Sears had evolved in Ruth's life Helen Townsend suddenly appeared...

Helen, not really surprised at what she saw, but a little more than surprised at what she heard, she said over and over again...

Ruth took in what Helen was wearing. When she had first come to Ruth had thought her expensively dressed; now she hardly knew. Helen was dressed very simply in a dark tweed suit...

"I love you, and I never saw you look so good as now," Helen said. "Do you know how much I paid for it?"

"Thirty-five dollars. It's the first suit I have ever bought with my very own money."

"It looks as if it cost more. Do you remember how much we used to spend for dresses? I saw that you had not changed your mind in going to marry a couple of days ago and she was dressed the way I used to be..."

"I don't think it's bad. Do you remember how much we used to spend for dresses? I saw that you had not changed your mind in going to marry a couple of days ago and she was dressed the way I used to be..."

"I love you, and I never saw you look so good as now," Helen said. "Do you know how much I paid for it?"

GIRLS DO THE COURTING NOWADAYS, 'TIS CLAIMED

They Pay for the Tickets to the Dance and Call Young Men on the Telephone, Says the Woman Who Was a Girl in Different Times

"IN MY DAY," said the woman with the graying hair to the young girl who was getting a new piece of frilling in her blue georgette waist, "it was the young man who did the courting..."

"Nowadays a young girl invites a young man to a dance and pays for the tickets, she uses her machine that night if she happens to have one, and likely as not it is her bouquet of flowers pinned to the front of her dress..."

"Some modern girls think no more of going to the telephone and asking young men to come down and spend the evening with them than they do of eating their breakfast. When the gentleman is leaving he is asked to be sure and come again and likely as not the question will be put pointblank: 'When are you coming again?'"

"In my day young ladies got flowers and candy and lovely valentines. Nowadays a girl is lucky if she gets a trip to the movies."

WAR RISK INSURANCE BENEFICIARIES SOUGHT

Home Service Section of Red Cross Asks Help to Find Missing

The home service section of the American Red Cross, 1607 Walnut street, has in its possession the list of a number of allotment checks from the Bureau of War Risk Insurance whose owners cannot be traced. It asks the aid of the public in locating the following persons:

- Emma Bate, 478 Rising Sun Lane, Philadelphia, Pa.; Lena Blossom, 1923 North 7th street, Philadelphia; Mrs. John S. Brown, 1120 Girard avenue, Philadelphia; Mrs. John S. Brown, 1120 Girard avenue, Philadelphia; Mrs. John S. Brown, 1120 Girard avenue, Philadelphia...

If you grocer tells you that he cannot get the A.I. Sauce—that it is no longer manufactured—please tell him he has been misinformed. He can obtain A.I. Sauce in both sizes and in any quantity, of the same high quality and fragrant flavor as before the war. Thank you for helping us correct this false impression. G. J. Heubler & Co., Hartford and New York.

\$1,000,000 BOOKS FOR ARMY

Purchasing Contracts for Y. M. C. A. Volumes for Soldier Schools

Washington, March 22.—(By A. P.) General Pershing has approved to purchase from the Young Men's Christian Association nearly a million dollars' worth of test-books covering practically every phase of general and technical education, from elementary schools to the great universities and technical schools.

A report to the War Department placed by the Y. M. C. A. officials on the books already obtained by their agencies in connection with the army educational program, was approved by the general and had been accepted by the army.

The transaction marks the transfer of the complete Y. M. C. A. library to the army and the post-graduate scholarship to army control.

EVERY one wants roses. We all acknowledge that a garden is never complete without them, and yet so many of us hesitate to plant them because we think they are so difficult to raise. Now this is a mistake. They have healthy constitutions and all that is necessary is to understand their wants. Certain conditions they demand and if we really care for them we soon know their requirements. Their first demand is a sunny location. Whenever possible give roses a southern exposure. Then they must be protected from northern wind if we would keep them vigorous and the size of their flowers up to normal. Roses must have soil especially prepared for them. Dig the soil to the depth of two feet. If you are suspicious that the drainage is not good, place a layer of cinders in the bottom. Cut some good soil in small pieces. One-fourth inch is not too much. Then add one-fourth well rotted cow manure. Most dealers supply this in large quantities prepared for rose plots. If you cannot get this well-rotted stable manure, mix this combination very thoroughly. If you use budded stock you will upon close examination notice an abrupt offset where the bud was inserted and the new roses set this juncture three or four inches below the surface of the soil. This favors the formation of new roots. The shaded or top portion of the cuttings should be kept in a dry place, and greatly interfered with the tendency of the original roots to send up suckers. Let me emphasize here that should these suckers appear above the surface of the soil, cut them off, under no consideration allow them to grow. Never permit the roots of your roses to be exposed to frost nor must the roots be permitted to become dry. If they do they immediately lose their vitality. Before planting cut away most of their tops. After you have placed them, firm the soil about their roots. When you place them separate the roots as much as possible. Should the day be dry on which you plant them, place a paper shade over them for thirty-six hours. Next give them a thorough soaking with cold water. The season for transplanting hardy roses is April, May, October and November. This phase of rose culture is in all cases regulated by the habit of growth of each particular bush. Generally speaking, all weak shoots are cut back and all strong ones permitted to grow. The old-fashioned rose needs the least pruning. Hybrid perpetuals require close pruning before the middle of April. The weak shoots should be cut back close, the strong ones to the fifth or sixth eye. If less is cut away the number of blooms will be larger, but the size of each individual flower will be smaller. Climbing roses should have their shoots cut away and also those that are weak, while vigorous branches can be left their entire length. Roses require a great deal of water. They must be given sufficient water at such intervals to reach the lower roots. This means at least a bucketful to each bush. A trench on the surface aids greatly in preventing the soil from drying out quickly. For middle use Bordeaux mixture or sulphur. For aphids, or plant lice, a weak, white solution is cut back her and all strong ones permitted to grow. The old-fashioned rose needs the least pruning. Hybrid perpetuals require close pruning before the middle of April. The weak shoots should be cut back close, the strong ones to the fifth or sixth eye. Hybrid perpetuals require close pruning before the middle of April. The weak shoots should be cut back close, the strong ones to the fifth or sixth eye. If less is cut away the number of blooms will be larger, but the size of each individual flower will be smaller. Climbing roses should have their shoots cut away and also those that are weak, while vigorous branches can be left their entire length. Roses require a great deal of water. They must be given sufficient water at such intervals to reach the lower roots. This means at least a bucketful to each bush. A trench on the surface aids greatly in preventing the soil from drying out quickly. For middle use Bordeaux mixture or sulphur. For aphids, or plant lice, a weak, white solution is cut back her and all strong ones permitted to grow. The old-fashioned rose needs the least pruning.
