

BUSINESS NOTES

Inquiries for machinery are numerous, but few result in actual business, according to manufacturers. There are said to be more inquiries in hand than at the peak of the war period, when the government was taking nearly all of the output. The one industry that is buying heavily regardless of high prices of machinery is oil, the reason being the increase in the use of oil for fuel.

Buying of Japanese raw silk has abated somewhat, but prices remain firm. Supplies of the coarser grades immediately available for manufacturers in the United States are reported to be lighter than at any time in recent months. The absence of the

most sought grades tends to restrict trade. The Chinese markets are said to be firm in price, but business in the Chinese product is confined to small lot buying.

Further relaxation of restrictions on the exportation of hides and skins by foreign countries was announced yesterday by the Tanners' Council. The Royal Swedish Commission informed the Washington office of the council that the Swedish government is prepared to grant licenses for the exportation to the United States of 150,000 catkins, weighing four kilos (8.3 pounds) each. The council also was informed that the Danish Government is granting licenses for the exportation of skins and light hides and will probably remove all export restrictions in June or July.

No decrease in the prices of medium and better grade clothing and possibly a moderate reduction in lower grades containing reworked wool (shoddy) and cotton, that is the prospect for the fall and winter of 1919. This statement was given out officially in Chicago yesterday as representing the opinion of members of the National Association of Clothing Manufacturers who met there.

The Winnipeg Grain Exchange announces that all restrictions on export of oats to Allied countries have been removed.

War materials to be sold by this government to private concerns will total perhaps \$2,000,000,000. Acting Secretary of War Crowsell stated Tuesday. Six for the War Department has sold about \$200,000,000 worth of material. At present the army owns about 1,000,000 tons of steel which is to be sold, probably as junk, to be used as raw material.

JULY COTTON ACTIVE IN INITIAL TRADING

Bullish Weather Map Induces Purchases of New Crop Positions—Room Traders Sell

New York, April 9.—There was active buying of the new crop positions at the opening of the cotton market today, because of a bullish weather map. A low barometer, which caused considerable rain in Texas, seemed to be moving in an easterly direction, thus threatening the central belt, also, where a dry spell is urgently needed for carrying on farm work.

Liverpool was a buyer of the late months and New Orleans interests bought July.

On the other hand, many regarded the foreign political news as less favorable and this fact led to some selling by room traders, which was absorbed by spot houses.

The weekly report of the Weather Bureau read no more favorably than had been expected and proved the signal for some trading, but offerings were absorbed readily with the market firm on buying which and the forecasts, which pointed to unsettled conditions with unseasonably low temperatures in the Southwest.

The advance was led by the early new crop months, with October selling 43 points above last night's closing figure on buying which and the forecasts, which pointed to unsettled conditions with unseasonably low temperatures in the Southwest.

Price of Lead Reduced New York, April 9.—The American Smelting and Refining Company has reduced the price of lead from 5 1/2 to 5 cents.

GOSSIP OF THE STREET

VOLUME OF SUBSCRIPTIONS TO SPECIAL LOAN SURPRISES

Bankers Thought Purchases Exceeded \$200,000,000 War Finance Issue—Gossip of the Street

There was a good deal of surprise expressed in financial circles yesterday over the announcement from Washington that there still remained some \$10,000,000 of the \$200,000,000 issue of war finance corporation bonds, the proceeds of which were to go toward assisting the railroads. There was a general impression that these bonds were very much over-subscribed and that the only question to be decided was what proportion of the subscription would be allotted. It was therefore a genuine surprise to many to find that they were to receive a 100 per cent allotment, and more if wanted.

A banker, who highly approved the government's plan of disposing of these bonds through regular channels of bond houses, allowing even a small commission, said he would have to revise his opinion. The only reason which appeared to him in favor of an over-subscription was the emphasis which the Federal Reserve Board in its circular letter placed upon the fact that they were not a direct obligation of the government.

There was some discussion on the terms of the forthcoming Victory Loan in this connection, some bankers maintaining the Victory Loan should also bear 5 per cent interest, the same as the war finance corporation bonds. One of them, however, held that securities not a direct governmental obligation should carry from one-half to three-quarters of 1 per cent less than those which are a direct obligation, like the Victory Liberty Bonds.

It is said the rates and terms of the Victory Bonds will be determined next week and announced a few days before April 21, the opening of the selling campaign. The bonds are being printed and will be completed, it is said, as soon as the terms are announced.

Early Return of Railroads to Owners Expected The early return of the railroads to their original owners in New York is the topic which is being discussed among financial men in New York. It is generally conceded that they are to be handed back in a way that will cause universal satisfaction.

There is some talk in this connection of a guarantee of income, he said, but ideas expressed on that particular phase of the subject were not definite. It is generally conceded that the plan most favored by railroad financiers is for the government to increase the rentals to such figures as would leave a handsome margin of profit. The present compensation of the railroads is considered to be insufficient, and it is believed that the government will receive less through taxes from that source than was anticipated, through the sale of such securities by wealthy investors, so that they can register their losses under the income-tax law, and others will not purchase them except at sacrifice prices. Those who reason in this way claim that if the government will increase the rentals sufficiently the center of the roads will appreciate so much that they will be able to finance themselves.

Philadelphia Markets GRAIN AND FLOUR WHEAT—Receipts, 234,400 bushels of soft winter wheat and the market ruled steady.
