No Chance for Square Deal on Motortruck Sales Managers, which will Attitude at West Cheste Charter, Says Chairman While Senator Is Contractor

MILLION - DOLLAR PROFIT

Charter revision for this city cannot et a "square deal" from Senator Vare as chairman of the Senate municipal mairs committee, charges John C. Winston, chairman of the Philadelphia

As a legislator considering the Woodward bills, asserts Mr. Winston, the senator cannot divorce himself from his identity as a contractor making a offt of a million dollars a year from city contracts.

After a protracted charter hearing esterday in City Hall Mr. Winston save out a statement asserting that "every attempt is being made to befog and confuse the issue in regard to the revision of the Philadelphia charter."-The crux of the entire opposition to the charter bills, he said, is the hos-tillity to a single-chamber council as provided in the measures.

Members of the reorganized council. Mr. Winston said, would be elected by senatorial districts, one for each 20.000 of population, instead of being elected by wards. Through the present ward system, he alleges, one-third of the roters of the city elect a majority of councilmen.

"What objection can there be to this epresentative system?" Mr. Winston asks, referring to the election by sena torial districts. "Let our opponents face this issue squarely instead of talking about a lot of side issues that they really care little about.

"The whole trouble with Mr. Vare is that he is attempting the impossible task of occupying two positions at the same time. As chairman of the committee on municipal affairs of the Legislature he is bound by his oath of office and by every consideration of honor and public duty to entirely disregard the private interest of Edwin H. Vare, contractor; but unfortunately at a formal hearing he appears to have in d Edwin H. Vare, the contractor, and he considers every provision of the proposed new charter with reference to its effect upon the fortunes of Edwin H. Vare.

"It is to much to expect from any eing who is making a profit of De fairly to consider egislation affecting Philadelphia, and yet that should be his sole thought while occupying the position as chairman of the committee of municipal affairs under the Legislature of this common wealth."

ANY men are misinformed as to what really constitutes "style."

The idea as exploited in machine-made clothes. is that style is expressed by a hard, uncompromising immobility of outline in which there is more buckram than beauty. The style of Jacob Reed's Sons clothing is essentially different.

In the first place it is designed by artists, not by artisans.

In the second place it is largely tailored by hand, not reed by machinery.

Reed's clothes hang easy, look easy, feel easy-and without e you cannot have style.
