STOCK TRADING UNUSUALLY LARGE AND PRICES ADVANCE

U. S. Steel Attracts Attention—Philadelphians Buy Baldwin. No Weakness on Profit-Taking

New York, April 21.—This was the day of largest transactions on the stock exchange so far in this movement, with the million-share mark passed early in the afternoon after 250,000 shares had been traded in during the first fifteen minutes. The dealings from the opening were of the most vigorous character, with buying orders coming in a flood from many sources, while at the same time large interests here realized profits on immense lines of long stock, causing a supply that only a market of record-breaking demand could absorb without violent breaks.

In all respects the day was another chapter in the story of the greatest bull movement Wall Street has ever known, but that violent advance was made but that the opportunity was presented for these profit-taking sales and for the shifting of large holdings to new hands. United States Steel common was held close to par, selling all the way from 100 1/2 to 99 3/4, but the railway equipment stocks, which were easily moved, attracted attention by brisk advances, with Railway Steel Spring making the greatest gain in this group.

There was a diversion of interest to many of the lower-priced industrial issues, with Paper advancing more than 4 points to 52, and American Writing Paper preferred rose 3 points to 52 1/2. The marine issues swung over a wide range. American International advanced to 91 and then declined to 86 1/2. Marine preferred, after advancing more than 1 point to 118 1/2, dropped to 117, with a sharp rally from that price in the late trading. The common stock rose about 3 points to above 28, a new high record for the movement.

In the bond market the chief feature was the increased offerings of the fourth Liberty 4 1/2s, which forced that issue down to 93.30 soon after noon.

There was heavy trading in many industrial issues, with the Pierce Oil and Sinclair Oil securities among the most prominent features.

CRAMPS CONTINUES TO LEAD TRADING ON LOCAL EXCHANGE

Certificates Advance 61-4 Points to New Record Price of 125 1/4, but React Later—Storage Battery Strong

William Cramp Shipbuilding continued to be the center of interest on the Philadelphia Stock Exchange today. Early in the session it became prominent, after reacting slightly, rose to 125 1/4, a new high record and an upturn of more than 32 points in a week. Later in the day, however, profit-taking set in and by mid-afternoon sales were recorded around 120.

This reaction caused no uneasiness in the Street and was considered what might have been expected, as it was pointed out that many speculators had been attracted to the certificates last week when they started their sensational climbing who would naturally sell their holdings and pocket their profits whenever the certificates advanced to a high point. And, notwithstanding the fact that the movement had been the widest recorded on the local exchange in such a short time for any issue in several years, there were many in brokers' offices who expected a further advance before Thursday's annual meeting.

Electric Storage Battery was also active and strong, scoring a wide gain to a new high level of 7 1/2, with buying coming from the same sources that caused its upward movement several weeks ago. General Asphalt preferred came to prominence again, advancing 1 point on a small turnover, and Lake Superior Corporation was active and firm, the strength being about 28, 30 1/2, \$177,540; operations for nine months showing increased business, but in the latter part of the session it showed a reactionary tendency in line with the course of Steel common, which, after selling above par, turned downward.

The remainder of the list attracted little attention, sales being small and, with few exceptions, prices held steady. Bull and Rapid Transit certificates Electric came out unchanged.

In the bond division Liberty Loan issues were generally a little below their previous quotations. The income and surplus account of Tonopah Mining Company, of Nevada, for the six months ended February 28 mailed to stockholders, with dividends disclosed, shows gross value of ore milled, \$688,707; mining, milling, marketing and general expenses, \$450,579; net earnings, \$123,003; miscellaneous income, \$181,241; net income, \$304,843; cash on hand, \$1,000,000; total, \$1,304,843; balance after dividend deduction, \$798,031; loans to subsidiary companies, \$2,783,853.

Subscriptions to the ninth issue of Treasury long certificates, known as Series 5 J, which closed on April 17, amounted to \$30,160,500 in the Philadelphia Federal Reserve District, as against a quota of \$34,300,000. The balance of the issue was subscribed in other districts, when a 20 per cent installment of the Victory Loan is payable.

On the nine issues of certificates financial institutions in this district have taken a grand total of \$385,033,000. The first issue which matures May 6 has been called for redemption, however, leaving \$130,905,000 certificates outstanding, which are applicable to payment on the Victory Loan.

The next regular biweekly offering of certificates, due April 24, will be deferred until May 1 and will serve to refund the balance outstanding of certificates maturing May 6.
