

LIGHT NEUTRAL FOOD REGULATION

Import Restrictions on Germans From Other Neighbors Also Eased by Allies

FISHING LIMITS EXTENDED

Paris, April 30.—The supreme economic council at its meeting Monday passed upon measures for feeding Germany and the northern neutral countries and Switzerland. It was announced that the naval armistice authorities have removed restrictions on German fishing in parts of the North sea.

The official statement on the meeting reads: The supreme economic council met at 10 a. m., on April 28, under the chairmanship of Lord Robert Cecil.

Concerning German fishing in the Skagerrak and Cattagat the council was advised that, after its action at the last meeting upon the German request for permission to fish in those waters, the naval armistice authorities have removed restrictions as to the Cattagat and have extended the North sea limits so as to permit the German fishermen to make use of a passage free of mines to and from the several fishing areas.

It was reported to the council that the blockade section has taken appropriate steps to give effect to the decision of the council that the rationing regulations established during the war with respect to the importation of commodities into the northern neutral countries and Switzerland be suspended. In consequence hereafter all commodities other than a specified list of war material may be imported into those countries without restriction on quantity. It has also been decided that shipments of foodstuffs from the countries in question to Germany may be made without the requirement previously existing that each shipment receive the approval of the inter-Allied trade committee in the respective countries.

To facilitate commerce and the forwarding of relief supplies the council agreed to the recommendation of the blockade section that hereafter shipment may be made through Germany of all commodities except unfinished quantities of war, provided the shipments are covered by a license of an inter-Allied trade committee, or where no such committee exists, by a license from the relief administration.

The council considered the important question of facilitating commercial and relief traffic on the Danube river, but deferred final action in order to permit the further study of the several methods of regulation which were proposed.

In pursuance of its plans of improving coal production and distribution to meet the present general deficit in the European coal supply, the council decided that the director general of relief should for the present be charged with all matters in an endeavor to increase the coal production in the former empire of Austria-Hungary and Poland. The director general of relief is to work through the mission of the communications section of the council, which is charged with the operation of through railroad services for the distribution of food supplies in the territories in question.

Berne, April 30.—Because of the increasing difficulties of provisioning Switzerland with meat the federal council has decided to forbid the eating of meat from May 5 to May 19 throughout the nation. During this period the killing or sale of cattle also is forbidden.

HUMAN BONES FOUND IN MYSTERIOUS VILLA

Grotesque Discovery Said to Be Connected With Disappearance of French Women

Paris, April 30.—(By A. P.)—A search by a magistrate and police authorities of the villa of Henri Landru at Cambaix, a suburb of Paris, from which the disappearance of a number of women led some time ago to the arrest of Landru, has resulted in the finding in the carriage house at the end of the garden an enormous heap of cinders.

Among the cinders, according to the authorities, were calcined bones, pieces of ribs, tibiae, arm bones, one tooth, a fragment of melted glass and one hair-pin. The landlord of the villa is to be questioned by the authorities today as to whether Landru is in any way connected with their discovery.

It is asserted that in the cellar, which is cemented, large blood stains, covered with sand, were found.

A dispatch from Paris April 15 said the disappearance of a number of women who had been seen to enter the villa occupied by Landru, but who had not been seen to leave the place, had brought about the arrest of Landru, who was to be requested to aid in solving the mystery of their continued absence from their homes. The missing women were acquaintances of Landru's, who was declared to have made a specialty of becoming engaged to widows. The police asserted at the time that from papers found in Landru's possession they believed he had had at least ten fiancées who could not be found.

GAMBLERS' PRINCE HONORED

Scientists Give Medal to Owner of Bank at Monte Carlo

Washington, April 30.—Prince Albert of Monaco and Charles Fabry, professor of physics in the University of Mar-seilles, France, were awarded medals for their contributions to the advancement of science at the annual dinner last night of the National Academy of Sciences. Dr. Charles D. Walcott, president of the academy, made the presentations.

Professor Fabry was awarded the Henry Draper gold medal for notable investigations in the sciences of astronomical physics and particularly for his researches in connection with light of the sun and other astral bodies. The Alexander Agassiz gold medal, the highest recognition of the National Academy, was presented to Prince Albert for his original contributions on oceanography.

Trouble Troubles Double Trouble Double Trouble, N. J., April 30.—Some of the residents of this town have started a movement to have its name changed, thinking the present name has acted as something of a "hoodoo" in keeping persons from settling here. When the town was settled several of the early settlers had a season of bad luck and gave the odd name to their new
