INDIGESTION RHEUMATISM URIC ACID GOUT

This is just a modest little appeal to the average American who gets his pay envelope every Friday or Saturday night and who has, oh, so many things to do with it.

Don't let's lose that over-the-top spirit which is so typically American.

Your Government needs \$4,500,000,000 or it would not have asked for it. And you and I, in our small way, can both of us help to put it over-BIG.

Why, there isn't an American in the country-a real American-who cannot afford just one more bond.

-or who will not be proud to say, in the years to come, that he did his part for democracy :-- yes, even though he stayed at home.

As Secretary of the Treasury Carter Glass so ably puts it:-

"There are yet two million American boys in France and Germany who must be maintained in comfort and brought home in safety, and provided with employment on their return.

"The honor of the Government is involved. And being your Government, it is your honor that is involved.

"I know that the appeal of the American Government to the American people will meet a response of which the Nation will be proud."
