EVENING PUBLIC LEDGER-PHILADELPHIA, THURSDAY, MAY 8, 1919

Consumption Here Exceeded months. Only by Chicago, Which **Has No Meters**

177 GALLONS PER PERSON

How Big Cities Stand in Water Consumption

The per capita daily consumption

of water in large cities, according to statistics> follows : Chicago, 259 gallous. Philadelphia, 177 gallous. Baltimore, 140 gallons. St. Louis, 136 gallons. ston, 106 gallons. New York, more than 100 gallons

Philadelphia is with a single excep-tion the largest consumer of pure water ion that certain other factors will al-

of all the great cities of the country. Every man, woman and child in the

the large cities shows some wide variations accountable only by the different not accounted for in the municipal water

ing plants along rivers and bays and the versal metering would help a lot, but it existence or nonexistence of meter sys. looks to me as though per capita contems of a universal character. Chicago to Install Meters

With Chicago leading the list with

lation of 2,000,000, which would bring PARADE OF CAMDEN the per capita figure down to 160 gallons. The average daily consumption for 1918 was 320,000,000 gallons. So far this year, with the meter service in effect, IN USE OF WATER in so far as factories, etc., are con-cerned, the average daily figures are 310,000,000 gallons. This total, it is ex-TROOPS SATURDAY pected, will be increased to the danger point throughout the hot summer Ranks of 114th Infantry Are

The universal meterization of the more The universal meterization of the more than 300,000 small homes would, ac-cording to Chief Davis, reduce wastage and carcless usage to a point that would result in a saving of 48,000,000 to 50,000,000 gallons of water daily, thus bringing the demand within the possible wedgetien of the present filters and

production of the present filters and pumping stations. A universal meter ordinance is being When the victorious "thousand" of held up, after receiving the approval of New Jersey's 114th Infantry swing a councilmanic committee because its provisions do not suit certain political interests that are not anxious to press

Meters Cost \$6,000,000 The cost of installing meters is esti-mated to be \$6,000,000. The cost is placed by the pending bill upon the owners of property. They in turn have argued to councils that the cost should be placed upon the tenant and con-ters and the company of the third Regiment. The boys will be in command of Lieutenant Stanley, of Woodbury, who was elevated to acting captain when Contain George Selby was elevated to artillery's work in France.

12 last, according to Mayor Charles H. Ellis

ways contribute to keep up the high consumption water rate. In explaining in part the high rate, he said: "It is In proclaiming the parade the mayor today pointed out that only twenty five officers and 994 men from New Jer-

Greatly Depleted, Mayor's

Proclamation Points Out

Every man, woman and child in the city had an allowance of 177 gallons daily during 1918, and almost as great an allowance for the first four months of the present year. Chicago, with no meters and few re-strictive provisions, allowed '259 gallons to each resident each day last year. A per capita basis is not altogether fair in the opinion of Chief Davis, of the Water Bureau, in that peculiar con-diffect many of the larger centers of pop-ulation where consumption daily is on a much lower average. Here that be in the state of the fact of the fact of the state of the st

much lower average. He says that if New York, Boston or any other eastern city, where per capita toons that exist in this city of small homes and many textile manufacturies, their rate of consumption would jump to a par or nearly to a par with our own.
