The Sale of Klearflax Rugs is a Real Opportunity

for any one needing rugs for a Summer cottage.

Or for a hotel, hospital or other institution.

Or for an office.

You Get Three Rugs for the Usual Price of Two

The reason we can sell these splendid linen rugs for a third less than regular prices is because they are what the manufacturer calls "oversizes" and "undersizes." That is, they are the last piece of goods on the loom and are either larger or smaller than the stock size. There is such a large lot that you will have no difficulty in getting satisfactory sizes-if you do not delay too long.

Klearflax linen rugs are handsome, durable rugs that are heavy enough to lie flat and thick enough to deaden the sound of footsteps. They are closely woven and can easily be kept clean.

One of the best features of Klearflax rugs is their soft, single colors, which harmonize with any furnishings. The colors are taupe, gray, pink, brown, blue and green.

Furniture That Seems to Keep Places and People Cooler

It seems as if there is such a thing as temperature in furniture; that is, in the material and construction of it, but especially in the suggestion or feeling that they convey. Of course, everybody can understand how much cooler is a flexible, open-worked wicker chair

than a great luxurious easy chair with its hot, downy upholsteries. Everybody who is human can understand also that there is something about the appearance and construction of wicker furniture which at once

suggests coolness, a coolness one cannot easily associate with regular furniture for obvious reasons-in a word, the temperature of wicker seems The weather we have been experiencing gives the Summer furniture display a very timely in-
