CIVIL ENGINEER

Princton, June 16 .- The one hundred and seventy-second annual commence ment of Princton University took place this morning at 11 o'clock in Alexander Hall. It was Princeton's first postwar commencement and was an unique heritage of the war, as there were two graduating classes.

Many members of the class of '18. who would have received their diplomas last June, had they not been absent in service, returned to their studies at the close of the war and completed their courses. They formed a graduating class by themselves.

As the veterans of the battlefields, who had already received the Princeton war certificate, passed before President Hibben to receive their final college degree, the applause that greeted them was deafening. The veterans of the '18' numbered about seventy-five.

Honorary degrees were conferred by Dean West as follows:

Paris, June 16.—Figures gathered on the relative taxation resulting from the war by the financial advisers of the American peace delegation show that France and Italy increased their taxation about 1100 per cent. Great Britain about 1100 per cent and the United States about 2000 per cent. The American financial advisers, therefore, maintain that the repayment of the war advances is not only an obligation but also nationally falls on those who have borne the smallest percentages of war taxation.
