# PHYSICIANS DEMAND TUBERCULOSIS WAR

Health Insurance by States Advocated as Weapon in Fighting White Plague

### INFLUENZA BORN IN RUSSIA

Special Dispatch to Evening Public Ledger Atlantic City, N. J., June 17 .- Practical men discussed practical measures or cutting in half America's ratio of 140 deaths annually from tuberculosis of every 100,000 of population, before the post-bellum convention of the American Tuberculosis Association here oday, while rejoicing over statistics showing a saving of 30,000 lives yearly uring the last decade through concerted action and awakened public opinion.

"There can be no solution of this great problem among workingmen and women without health insurance," declared John A. Lapp, of Modern Medicine, Chicago.'

"Any municipality and state can fford, in self-protection, to assure every wage earner his family will be provided for while he is regaining his health," said Walter S. Ufferd, of Washington.

in Indiana, reported that, as a result of an educational movement there Indiana has created by law a tuberculosis department in its state board of health and provided a budget appropriation for clinics, nurses and housing inspec. Effectiveness Proved in Discus-

Donald B. Armstrong, of Massachuetts, advocated community health drives to discover tuberculosis, declaring too much responsibility has been placed PHILADELPHIANS TAKE PART upon a small group of workers in most

"When we appreciate that emerged from his more primitive, ape-like ancestors and that this is as nothing compared to the fifty or one hun-dred million years during which living forms have evolved, it is conceivable how important may be the consideration of tuberculosis from the broader time cept," said Lieutenant J. P. Givlor, of New Haven.

Dr. Julius Dworothsky surprised the convention by declaring after several rears of study he is convinced that the former conviction that tuberculosis of cussion. the larynx is a hopeless complication, is due chiefly to a faulty classification of cases. The seriousness of this com-plication does not depend as much on the extent as on the character of the lesion. Sub-acute cases, under proper treatment, present a hopeful outlook. "Every epidemic has a home." Dr. Simon Flexner, of the Rockefeller Institute, declared last night in his presidential address before the Congress of Physicians and Surgeons. "In the case of influenza, it is not Spain, but the Russian border of Turkestan from which all the influenza epidemics have started.
"The new task of a revolutionized

The new task of a revolutionized medical profession is to catch these epi-demics at their source. We must organize a service to clear up these areas."

In comparing the two recent epidemics, Doctor Flexner said infantile paralysis was made inconsiderable by the inroads made by the "Spanish flu." Influenza caused the greatest number of deaths in the same space of time than any epidemic we know, he declared.

### ATLANTIC CITY PRIEST **HEADS CAPITAL HOUSE**

ather McShane, Once Villanova Official, to Direct Home for Theological Students

By a Staff Correspondent Atlantic City, June 17 .- Father F. J. McShane, long identified with St. Nicholas Catholic Church in this city, will have charge of a new house which intravenous injections of serum from the Augustinian Fathers will open at recently recovered cases of pneumonia. Washington, D. C., next fall.

The house will be used to lodge thelogical students from Villanova College, who will go to Washington to a chronic form of trench fever, which me special studies or to take postgraduate courses at the Catholic Uni-

Within a few years the Augustinian Fathers plan to build a large house for studies at Washington, where all their theological students will be and heart disturbances. Many errotrained. The projected house will ac-neously diagnosed affections really are ommodate from fifty to sixty students. at the temporary house. The theological school of the Augustinians at present is at Villanova, Pa.

Father McShane will not sever com-pletely his connection with St. Nicholas Church here. He expects to continue to spend a considerable part of his time

Father McShane was at one time in charge of Villanova College. He is per-haps most widely known for his work

MEUT. WILLIAM ABERNETHY Of 1805 Frankford avenue, member returned to the United States on the liner Madonna Saturday. A ser-geant of his special "A. W. O. L." squad in Paris arrested the officercrook who sold the Paris Metro for a down payment of 50,000 francs, and who would have got rid of an interest in the Red Cross had be not been seized in time

# Mary A. Myers, a campaign director AMERICAN SURGERY

sion on Rehabilitation of Human War Wreckage

By the Associated Press Atlantic City, June 17 .- Philadelphians taking a leading part today in a symposium of the American Surgical therapy. Association on rehabilitation of human

Dr. Robert G. Le Conte reported upon results attending the delayed or late extraction of intro-thoracic pro-jectiles, while Dr. Charles H. Frazier discussed surgical problems encountered in the reconstruction of peripheral nerve injuries. Salvage of the hand by plastic reconstruction was the topic of Dr. John B. Roberts, also of Philadelphia.

Doctor Muskowitz, of New York, said nature was a wonderful ally in operative cases of chronic empyema where special care was bestowed upon the sterilization of the wound.

Blood Tests in Pneumonia

Dr. Solomon Solis Cohen, of Philadelphia, in describing before the Association of American Physicians a new method for testing pneumonia immunity by means of the whole blood, declared the bactericidal action of the latter may readily be measured and that it is a far more sensitive indicator of immunity to pneumococcal infection that the agglutination test; nonpathogenic organisms are killed by the whole blood which possesses bactericidal properties wanting after coagula-

Dr. C. C. Bass said analysis of blood examination of more than 30,000 people living in Mississippi, in the most malarious regions of the United States showed malaria much more prevalent in children than in adults. The highest point is reached at seven years. The greater relative frequency of malaria in children is indicated by the fact that more than 50 per cent of all the malaria found was in persons under twenty years of age.
Dr. Alfred Stengel reported excel-

lent results attained in the treatment of eight cases of lobar pneumonia by

Trench Fever's Persistence

Little has been said thus far, Dr. R. D. Rudolf told the convention, about may last for months and even years, with a great tendency to develop into an acute attack if the patient undergoes any strain due to hard work, physical or mental, producing pains in various parts of the body, anemia neously diagnosed affections really are trench fever still lurking in the system There will be from eight to ten students of ex-fighting men and which may stay with them indefinitely.

The suggestion of Dr. Simon Flexner head of the Rockefeller Institute, in his annual address last night, that public officials who fail to keep streets clean and enforce health laws in large cities, shall be held personally accountable by voters for epidemics in their communities, caused a mild sensation among delegates to the Medico-Surgical Con-

in the erection of St. Nicholas Church and the other parish buildings here. The church is considered one of the would go further toward eliminating busyless than any amount of highbrow susquess than any amount of highbrow of the Home Breaker. One application of the personal liaappeals on moral grounds.

## **ANNOUNCES NEW** INFLUENZA CURE Four From This City Get De-

Doctor Claims Discovery by Which Patient Is **Immunized** 

PNEUMONIA YIELDS TO IT

By the Associated Press New York, June 17. - (By A. P.)iffuenza and pneumonia are no more o be feared than a boil on the back of he neck, according to Dr. Charles H. Duncan, one of the founders of the Allied Medical Associations of America, described his method of combating Spanish influenza by means of "immunizing a patient to his own poison. Upon 246 patients ill with pneumonia and influenza last winter Doctor Duncan said, he had used the treatment without a single fatality or any com-

one drachm of mucus from the infected hockey. area and pasteurize it in one ounce of filtered water where it remains several lours. One cubic centimeter of this effect a spontaneous cure of Spanish influenza, pneumonia, catarrh, or any similar localized infection. It will stop any cough, except tuberculosis, inside of twenty-four hours."

Doctor Duncan declared that his discovery was based upon his observation of a dog licking a sore paw. He said the dog, by increasing germs of resistance at the place of infection brought about a natural healing and the method he employed was similar in that it increased the leucocytes or white corpuscles of the blood and these in turn carried the poisons out of the human sys-

Dr. George F. Laidlow, professor of the history of medicine and diagnosis at Flower Hospital, in discussing the Duncan method, said that the discoverer "has solved a problem that has been germinating in medicine for 2000 years. Doctor Duncan's work marks the conclusion of Pasteur, Koch and Wright and is a decided step forward in the regular development of bacterial

Doctor Duncan said that by taking wreckage of war learned that Amer- the poison from a boil and subjecting ican procedure is fully abreast of it to his process and injecting the the most advanced practice in Europe. Sir Robert Jones, of Liverpool, and Colonel Anton De Page, of the Belgian rendered him immune against a repeti-

# Coolness for Warm Days in Wanamaker's Down Stairs Store

A Raincoat Special for Women

250 Raincoats at \$3.90

It is a full-length belted model with buttoned pockets, as you will see in the sketch. The rubberized material is in a good tan shade and is light enough in weight to be used comfortably as a duster when motoring. When folded away it takes up scarcely any space.

Other raincoats in black, navy and tan at \$4.75 upward; capes and dolmans of light and heavy materials, \$4.50 upward.

Cloth Wraps Are marked at clearaway prices. Many are now \$9.75 to \$29.50. -A fourth to a half less.

### A Touch of Ribbon Smartens the Sports Hat

Smart ribbon bands are correct for sports hats-Panamas, light straws and dark straws. Some unusually good-looking ribbons in odd colorings show patterns of coin dots, Roman borders or black and white effects. A band of any one will quite transform an old hat or smarten a new one. 50c and 65c a yard.

### Taffeta Frocks for Little Girls

and are so comfortable on Summer evenings, especially when it is a little bit cool. Tan, rose or plaid taffeta frocks with pleated skirts have white silk collars and cuffs. The pockets are also trimmed with white silk. Sizes 6 to 10 years, \$5.50.

### Lovely Beaded Georgette Dresses, \$18.50 to \$35

the overskirts and skirts.

Many have round necks and cool, bell sleeves. Here and there are frocks braided in attractive designs and a few

# 72-Inch White Net,

The kind that women want for blouse and dress foundations.

### Colored Organdie Flouncing, \$1.25 a Yard

It is prettily tucked and may be had in rose, Copenhagen blue, pink, tan, orchid and white. 40 inches wide.

(Central)

### Coolness for the Choosing in Summer Draperies

It is the selection of colors and color combinations that counts. We have an excellent assortment of cool-looking silk madras in lovely colors: green, blue and rose. It is double width, 50 inches. \$2.75 a yard. Plain-color reps and poplins, 36 inches wide, are in tan, green, blue or rose. 70c to \$1.10 a yard.

### Double Duty

Terry cloth makes good door hangings, as it is double faced and so looks well from both coms. Many pretty verdure patterns, 36 inches wide, at 1.25 a yard.

### Fluttering White to Coax in Breezes Dotted and figured swisses

for curtains are 36 inches wide. 30c, 35c and 40c a yard. Drawn-work borders finish white, cream and ecru scrim of good quality. 25c, 30c and 40c a yard.

Special 30c a Yard White and cream marquisette is good for Summer curtains, as it launders so well. It is 36 inches wide. (Chestqui)

# They are so easily slipped on

The material is fine and in such delicate Summer shadeswhite and delightful hues of flesh and pink, pale coral. Most of the dresses are beaded in charming patterns and in rows on

dresses in navy blue are included.

### Crisp White Organdie—Special

75c a Yard It is sheer and evenly woven and is 40 inches wide. Special at 45c a yard.

40-inch mercerized white batiste is special at 55c a yard. 10-yard pieces of good, sturdy longcloth are \$2-a yard wide. (Central)

### Plain-Color Voiles 38c a yard

Here are lovely shades of pink, orchid, flesh, violet, gray, Copenhagen, rose and so on, 38 inches Fancy what delightful frocks they will make! (Central)
