VEAR after year this list grows. It is something more than a list of well-I known concerns owning ten or more White Trucks. It represents a yearly progress in added trucks per owner—the most extensive growth of individual fleets ever published by a truck maker.

The buyer of one or many trucks can have no better guide than the experience of those whose trucking volume affords a comparative knowledge of results.

There are now 2,774 fleets in active service, totaling 33,139 White Trucks, exclusive of all single truck installations.

The last column includes only the first three months of 1919
