# IDEAS FOR BABY'S MEALS-IT'S ALL IN THE POINT OF VIEW-FASHIONS-CYNTHIA'S LETTERS

MENUS FOR THE CHILD GIVEN BY MRS. WILSON

Simple, Easily Digested Foods Necessary for Children in Warm Weather-Glass of Milk Between Meals Provides Good Nutrition-A Warning About Flies

> By MRS. M. A. WILSON fCopyright, 1915, by Mrs. M. A. Wilson All Rights Reserved )

> > Supper

DURING the warm weather, every summer, many children are made seriously ill by eating foods that are either unsuitable or that have been carelessly handled or prepared.

10

Simple, easily digested foods that are prepared and served in an appetizing manner should be the daily portion of every child. The small child from eighteen months to five Thin Bread-and-Butter Sandwiches years should have food entirely different from that given children six to fifteen years of age.

The average child will require Boiled Potato from one and one-half to two quarts of milk per day for the eighteen Bread and Butter months' old child to one pint per day for the child of five or six years. The light, delicate cereals, such as natural rice, cream of wheat and barley, when thoroughly cooked, may be served for one or two meals each day. The small child should not be permitted to eat any fresh fruit. with the exception of the orange; this is one of the most frequent causes of intestinal disturbances. A potato, baked or boiled in its skin, should be served at the noon meal.

Many inquiries have come to me lately asking how much meat and how it should be cooked for the child just beginning to eat. Do not give children meat daily in summer unless the physician advises it. The small child is usually a very active person and for this reason he will need food that will help him to build up his Bread and Butter body, as well as supply energy for his activities.

He will need food to build muscle, tissue and bone structure, and foods that will give him plenty of energy; foods that will supply the mineral salts and the vitamines that are so necessary for his growth and physical well-being. And fat that will help to supply the energy and lubricate his system, and plenty of cool, but not ice-cold, pure drinking water to help the blood stream carry these nutriments to every part of the body. Good milk, home-made bread and fresh butter should form the main part of every child's diet until he is over ten years of age. Bread made from whole-wheat flour contains the sixteen needed elements that the human body requires for nutrition. Milk will furnish the child with material for muscle, bone and tooth structure, while good butter will help him with his energy requirement as well as furnishing him with the lifegiving vitamines. This may be supplemented with a liberal helping of well-cooked cereals and fresh vege-

When they reached the apartment, you know what I think about it. Once she did speak. It was just after they had walked down four flights of Ruth.

## What to Do By CYNTHIA

Please Tell Me

"Happy" Encourages "Doughboy" Dear Cynthia-Your comment, and the letter from "Experience," rather pleased me. The thoughts expressed were words of encouragement, which I appreciated and more strongly convinced me that mine was, indeed, the right attitude.

But today I want to forget "self" and reach out to "A Disappointed Doughboy.

"Disappointed Doughboy," I am wondering if I need your sympathy as much as you need mine? I did not stop at reading your letter just as you sent it, but read "between the lines, as well.

It was good of you to express the wish to hear from me, and yet I and at a loss to know just what you would like most to have me "talk" about. Your desire to meet me, or "one like ue." is appreciated. I'll frankly admit that you have aroused my curiosity to the utmost

Perhaps, if I give you some idea what kind of a girl I am, you won't find it quite so difficult to meet "one like me" as you seem to think.

I am just a natural girl, twenty-one years old. While I do not throw up my hands in horror at the girl who uses camouflage," that sort of thing does not appeal to me, so I don't even pow-der my nose. Actually! Modestly speaking, I am not pretty; nor would I have you think of me as some "homely I have a weakness for pretty prude. clothes—as every real girl has. To just be natural and make an attractive appearance interests me more. I have a cen sense of humor and invariably see the brighter side, realizing life is serious and regarding it as such. My disposition is a happy one and, all told, I am a happy girl, full of good, honest fun, and A Daily Fashion Talk by Florence Rose hankful for many real friends.

good girl is bound to suffer some day (or vice versa.) That thought gives me no fond of dancing the omission of parties satisfaction, however. Because I have during the war was a hardship, but suffered. I do not want another to share it is all forgotten now in the joy of the same fate. It is so much better the dance and added pleasure of having to have these unpleasant experiences before, than it would be to have married and then find the one you had necepted whom to dance.

atmosphere is not the one in which to mer, because there are many parties it up. rear children. in whom I placed my trust; who proved himself unworthy. Instead, I am de-voutly thankful that I had not already married him. Could there have been contentment and companionship be-tween two whose ideas were as far apart as the poles? Each must be unselfsh, for there can be no joy where one shows no consideration for the other. Each practice will soon bring good results. the consideration for the other. Each must do his or her share, toward mak-ing the union a happy one. The artist has designed a dancing frock for today, one which should be the requisite length and breadth, which are laid on the surface to be gilded. For this purpose one uses a broad broad the should be broad the start of the finger nothing comes off, the artist has designed a dancing frock for today, one which should be the requisite length and breadth, which are laid on the surface to be gilded. This gilding is not polished over. What is said of gold gilding a

What is said of gold gilding applies

There is i

Do not permit the children to eat green fruits or raw vegetables; these foods must not only be thoroughly washed, but must also be well cooked. Milk, fresh eggs or other protein foods that are permitted to stand in Milk the warm kitchen or in a heated room may become very dangerous foods, for you know that the deadly ptomaine germ will quickly develop in these foods during the hot weather if they are permitted to remain in a Soft-boiled Egg on Buttered Toast courteously. Baked Potatoes Bread and Butter warm place. The wise mother will teach her children very early to eat at the noon

and evening meal dainty salads made of crisp lettuce, slightly seasoned with salt and one-half teaspoon of bacon fat, in place of salad dressing. Fish and eggs can be easily prepared in most attractive dishes and will help to vary the monotony of the menu.

Thousands of children every year suffer untold agonies because of the carelessness in handling their food. Unless great care is taken food will spoil very quickly. Flies carry and deposit on food left in warm places the bacteria that quickly develop the ptomaine germ. Screen and use the swatter to banish this pest. Do not under any circumstances purchase food that is kept in overheated places or food that is exposed to the street dust and flies. Demand from your merchant a protection against these pests, the filth and dirt. Your child's life may be the penalty for such carelessness. Boil all water for drinking purposes and then cool it. Teach the small child to wash his hands frequently and thus he will help to safeguard himself.

If you have small children screen in the porch for their comfort. Flies and insects will then be deprived of their victims.
