## Every Good Mill Making Merchandise Carefully Inspects

the day's product, day after day, discarding from the perfect pieces as they leave the looms such as have broken threads, stains from the machinery or defects in warp or woof, and all such are sold as "seconds" by the mill owners.

Some of the jobbers buy as many pieces of the perfect as they buy pieces of the imperfect, and when the defects are slight, they mix them all together and the consumer is not informed of the defects.

The clerk selling them over the counter and the tailor-manufacturer who cuts them up and has them sewed into dresses pay no attention to the defects, and when the customer, ready to buy something, points out the defects he is told by the attendant that such things are usual and of no consequence.

The system of this Store from the beginning, based on instructions given the day before its doors opened, requires the clerk to point out any known defect, in even the best that the manufacturers send us, and also to call the attention of the would-be buyer to the goods that are bought by us as "seconds," and marked and sold at lower prices because they are bought at lower prices.
