MAGINE any first-class, mediumpriced car (\$1500 or \$2000) ever L becoming so well liked that even the millionaires would prefer it for their own use to even the highest priced cars.

Impossible.

You're right. Such a thing couldn't happen with a medium-priced automobile-nor, you would think, with anything else.

And yet this "impossible" thing has happened with a medium-priced cigarette. Just note, if you please, the evidence below, at the left.

How on earth did Fatima do it?

What is it-what does this mediumpriced cigarette give that these wealthy smokers prefer to anything given by even the highest-priced cig-

The answer is "Just enough Turkish"

Until they had tried Fatima, most of these men had been smoking straight Turkish cigarettes-because, of course, until a few years ago these fancy-boxed, expensive straight Turkish cigarettes were practically the only cigarettes on sale at places like those named below.

Gradually, however, it seems that these men have learned two things about Fatima:

1. That Fatima's famous blend (containing more Turkish than any other blend) has just enough Turkish for full flavor; and

2. That the blend is so "balanced" as to off-set entirely that overrichness or heaviness of straight Turkish.

Which proves again that Fatimas are a sensible cigarette-that they leave a man feeling fine and fit even after smoking more heavily than usual.

Has your present cigarette-has any cigarette-as strong a claim for your serious consideration as has

The batiste and Georgette Blouses are exquisite in their fineness of material and beauty of handwork. Some are hand made all over, some are handworked.
