

NORMAL RAILROADS SOON, SAY OFFICIALS

Predict That Systems Will Be Restored to Full Efficiency in Week

HINES WARNS CHICAGO MEN

By the Associated Press Chicago, Aug. 13.—Calling off of the federated railway shippers' strike in the Atlanta, Ga., district caused railroad officials today to predict that the entire rail system of the country would be operating at normal within a week.

Some Chicago Men Return

In Chicago several hundred boiler makers employed by the Chicago, Milwaukee and St. Paul road voted to return.

Officers of the Chicago district council of the federated railway shippers, who called the nationwide strike, in defiance of the orders of the international representatives of the union, received word today from Director Hines that the government would not negotiate any settlement with the local body.

Rate Increases Deferred Mr. Hines said the problem of freight rates was "inextricably bound up" with the question of wage advances, indicating that the long expected advance in rates probably would not fully develop until the wage demands were settled.

Railroad officials announced that attempts would be made to continue the

present train service without further cancellations until Friday. Modifications of the New York, New Haven and Hartford and the Boston and Maine embargoes made effective today removed the fears of many communities concerning the delivery of ice, milk and foodstuffs.

Corawell answered last night a communication from the Federation of Railway Employees of the Chesapeake and Ohio system, criticizing his opposition to the Plumb plan of government ownership of railroads. Is it Possible to Legislate Life and Brains?

Swift & Company is primarily an organization of men, not a collection of brick, mortar, and machinery.

Packing Plants, their equipment and usefulness are only outward symbols of the intelligence, life long experience, and right purpose of the men who compose the organization and of those who direct it.

Will not Government direction of the packing industry, now contemplated by Congress, take over the empty husk of physical property and equipment and sacrifice the initiative, experience and devotion of these men, which is the life itself of the industry?

What legislation, what political adroitness could replace such life and brains, once driven out?
