Patterson's Platform in Fight for Mayoralty

First. Water Supply—Immediate preparation of plans for a greater water supply to anticipate the wants of the city for many years to come. Second. Sewage Disposal—The completion at once of a sewage disposal plant to prevent disease and to save waste, thereby furthering a wholesome growth of the municipality.

Fourth. Finance—This city must pay as it goes. The finance must be on the soundest business basis. Expense must be kept within income. No department of the city government will be allowed to exceed its appropriation as voted by Council. Economy and efficiency must be the watchwords.

Sixth. Transit—The city must proceed at once to the construction and operation of the Frankford elevated and the Byberry extension line and provide for their connection with the Market street elevated. I hereby pledge myself to have these lines in operation during 1920. Ninth. Improvements—There must be general public improvements in order to crush the rent profiteer and those who are taking advantage of present-day conditions. New streets must be opened, sewers built, graded and paved.

Tenth. Sanitary Conditions—Housing and sanitary conditions must be of the best. All laws relating to these matters shall be vigorously enforced and those who seek to take advantage of the poor, the sick and the unfortunate vigorously prosecuted.
