How to Save Coal Clip this and put up near your heating plant KEEP soft coal fires level and rather thin. Spread fresh coal only over the thin places. Don't keep a roaring fire when little fire is needed. Always keep the fire box clean. Always spread coal out evenly when putting it into the furnace. Don't place fine coal on the bare grate. Screen your ashes regularly and use them to bank the fire at night. Carey Pipe Coverings are made of the best insulating material known and last indefinitely. They prevent freezing and sweating of pipes in winter. This saving in coal which they afford pays for the cost of insulation in a comparatively short time. AMERICAN INSULATION CO.
