Encouragement Found in the Favorable Turn in Railroad Labor Situation

WEEK'S EXCITING MARKET

New York, Sept. 6.—The weekly review of the stock market appears in the Mix today as follows: The current week in the securities market seemed clearly to point to the interesting fact that there is a larger number of persons who feel cheerful with respect to the state of the country than those who do not.

Could Not Keep Prices Down The paper profits which were not realized on Wednesday were taken on Thursday, and this in a measure held the bears in their renewed attacks.

It will, for example, be hard for the capitalist to see any merit in an attempt to limit return on capital because such a provision would tend to turn away that built up and incentive which have built up the railroad system of this country.

It would prohibit strikes If security issues are to be closely scrutinized by government, authority on the other hand strikes are to be prohibited.

The country is to be divided into rate districts, corporations to be under national laws and not state laws, and labor will have two representatives, and deprecators.

Why this sudden talk about "brutality," "hugency" and "awful situation" in steel labor circles, when the President had just left the country after sharing with him that the executive committee felt it could promise the quiescence of labor until the government could show that it might accomplish its aim of reducing prices.

Philadelphia Markets

WHEAT—The market was quiet. The standard elevator government No. 2 soft winter wheat, 42 1/2. Standard elevator No. 3 soft winter wheat, 42 1/4. Standard elevator No. 4 soft winter wheat, 42 1/4.

There was little trading and prices favored buyers. The market for the week was quiet. The standard elevator government No. 2 soft winter wheat, 42 1/2.

WEST BUYING FREELY IN NEARLY ALL LINES

Retail Trade of Greatest Volume Ever Known—Bank Deposits at Record Figures Chicago, Sept. 6.—A more hopeful attitude in the West of the trade situation is a feature, optimism being expressed in regard to labor outlook as well as in regard to other phases of the situation which have created more or less concern recently.

With bank deposits, both state and national, of record proportions, retail trade of the greatest volume ever known, and industrial reports reflecting increasing production in many lines, there is less tendency to be worried over foreign exchange or conditions abroad.

Reports from interior banks show a large surplus of funds, and as the money returns from this year's crops are put into circulation through investment or purchase of commodities, the buying demand will be further enhanced.

At nearly all cities and towns in the West, with the exception of Chicago, the building operations are expanding steadily. This is creating an undercurrent of confidence.

The volume of steel production is increasing, and with the prospects for an indefinite delay in labor troubles due to the reduced living costs, manufacturers are going ahead with much greater confidence and steel mills are now making plans to take care of the big business offered.

The general slump in cereal prices which has been a feature of the trade the last two weeks, has created a much more confident atmosphere, and, as prices are still high enough to insure good returns for farmers, the reaction is regarded as a favorable influence so far as the economic situation as a whole is concerned.

Money rates are unchanged, and there is no lack of funds available for all commercial purposes. BUTTER, EGGS AND CHEESE. New York, Sept. 6.—Butter—Ungraded, 100 lbs. case, 40 1/2. Graded, 100 lbs. case, 40 1/2.

OPERATIONS IN STEEL MILLS ON INCREASE

New York, Sept. 6.—The improved outlook in the labor situation has brought with it a better demand for steel products, according to some of the best authorities in this city. In addition, the mills of the country are again increasing operations, and it is the general opinion at present that conditions will remain settled for several months at least.

In some quarters it is stated that the outlook for the steel industry at the moment is as good as it has been at any previous time. It is indicated that consumers will purchase for their requirements, and the fact that it is difficult to place orders for many products is pointed to as indicating the situation as it exists at this time.

The situation in wire products continues excellent. There is a large demand and all the independent manufacturers are asking the advanced prices. The leading interest, the American Steel and Wire Company, is believed to continue to quote the old figures which were fixed months ago by the steel authorities.

Per Capita Circulation Increases. Washington, Sept. 6.—Money in circulation September 1, \$5,048,629,067. Washington, Sept. 6.—Money in circulation September 1, \$5,048,629,067.
