Unshaken Confidence Manifested in the Industrial Situation—Trading Element More Cautious

New York, Sept. 23.—Trading in today's market was distinctly more cautious than yesterday's. This was a natural outcome of the conflicting reports of the strike conditions. There was, however, no actual weakness shown. The steel and copper stocks yielded some ground, but this was more than counterbalanced by the vigorous upbidding of other speculative favorites, especially the oil, tobacco and operation shares.

Each outstanding feature of the day's operations was the pronounced under-tone of strength and the resistance against all efforts of the trading element to force a reaction. In scattering parts of the list, notably in the copper, there was some softness to be found, but the main spring of the market was distinctly strong. Intervals of extreme dullness punctuated the day's session, but at all times it obviously required less effort to push prices up than to depress them.

WALL STREETS MORE CAUTIOUS

Steel Stocks Gave Ground Gradually Without Signs of Weakness

Market is hesitating

New York, Sept. 23.—The New York Evening Star's closing financial review today says: Very few expected that yesterday's advance in the stock market would be resumed on the same scale in today's session. Whatever one may think about the ultimate issue of the strike, the fact there is a struggle on makes for uneasiness and disturbance. And this strike is no ordinary affair. It probably comes nearer to being revolutionary in character than any previous industrial outbreak in the history of this country.

INDIAN PACKING HITS LOW

New York, Sept. 23.—A feature of the trading on the Broad street curb this morning was the sharp break in the new Willco's Corporation stock from 45 to 25. It sold as high as 46 yesterday. Indian packing was also pressed on the market, falling down to the new low record of 10 1/2.

MONEY-LENDING RATES

NEW YORK—Money on call, both mixed collateral and all industrial collateral, opened today at 6 per cent for lending and receiving.

LOCAL INTEREST CENTERED IN THE ASPHALT SHARES

General Local List Showed Drooping Tendency as Result of Lack of Speculative Interest

The General Asphalt shares were the leading attractions of the local market. Both the common and preferred were found to be in scant supply at the opening, resulting in further animated bidding up of price in both issues.
