THE LARGE bombing plane, in which five fliers were injured, wrecked on the Bustleton aviation field en route from Washington to New York to participate in the coming transcontinental race. Bursting tires as the plane came down let the rims of the wheels dig into the ground, made soft by rain, causing the machine to overturn.

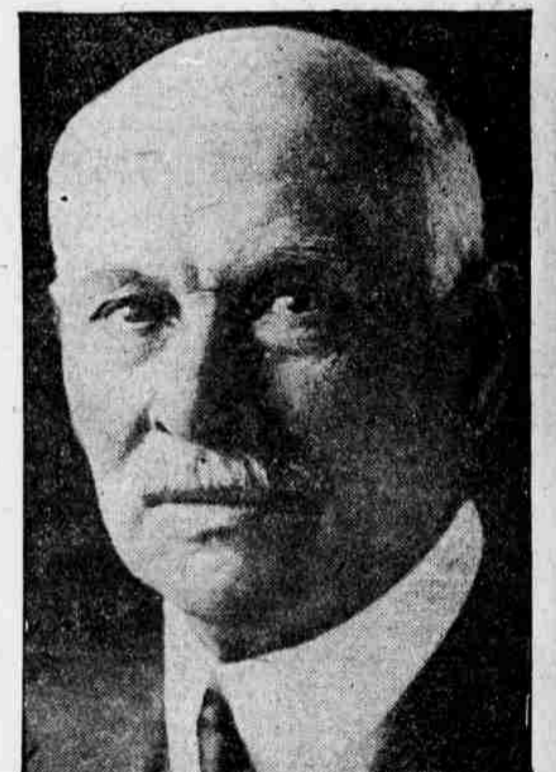

ARTISTS' MODELS of New York appearing in a Greenwich Village theatrical production have organized a community sewing circle for the purpose of making each other's fall wardrobes and repairing costumes, thus helping to reduce the high cost of their living. The circle sews one hour each day.
